MAKE YOUR GUTTERS
LEAFPROOF!

With Leafproof® installed, leaves and debris slide off your roof, while rainwater defies gravity by flowing easily into your gutters using surface tension.

www.leafproof.com

Eliminates the hazardous chore of climbing a ladder and cleaning the gutters.

Prevents water damage to your gutters, fascia, siding and foundation from over-flowing gutters.

Multi-patented process.

Installs under the first row of shingles.

Fits your existing gutters.

Blends with your gutters and roof line.

Can handle ANY downpour.

Proudly Made in America.

LEAFPROOF IS DESIGNED FOR HOMEOWNERS WHO WANT THE ULTIMATE PROTECTION FOR THEIR HOME.

Leafproof's Advanced Gutter Protection Systems can be installed on any type of roofing, including shingles, slate, metal and tile, and on any roof pitch.

Leafproof can handle even the heaviest rainfall while keeping debris from entering your gutters.

With Leafproof installed, you can avoid climbing dangerous ladders to clean your gutters.

LEAFPROOF IS SUPERIOR TO SCREENS, DOMED AND VINYL PRODUCTS.

Screens become clogged and easily mangled.

Squirrels and rodents easily chew through vinyl covers.

Many products screw into the roof, which may cause roof damage.

Leafproof does not screw into your roof and has a low profile.

LEAFPROOF

More than 200 million feet of the original Leafproof Gutter Protection System has been installed over the last decade. Leafproof is a solid aluminum gutter cover that installs over existing gutters without penetrating the roof.

- Made of 0.024 Aluminum
- Panels are 4' long
- Fits 5", 6", & 7" gutters

LEAFPROOF XP

Leafproof XP® is ideal where extreme protection is needed. XP was designed to handle rainwater in high flow areas like metal roofs, steep roofs and roof valleys. The diamond vents allow rainwater to flow into the gutters while keeping leaves and debris out.

- Made of 0.024 Aluminum
- Panels are 4' long
- Fits 5", 6", & 7" gutters
