

# LOW-OVERHEAD DIGITAL FORENSICS AND DATA CAPTURE FOR HR OFFBOARDING AND LEGAL HOLD

Veteran CFO Alliance LLC d/b/a  
**Crossroads CyberWorks Capabilities Statement**

We specialize in low-touch digital data capture for employee offboarding, internal investigations, and legal hold matters. Our services include court-ready forensic evidence capture, device imaging, secure data destruction, documented chain of custody, and audit-ready reporting with minimal disruption to business operations.

## CORE COMPETENCIES

- EnCase digital forensics device imaging of laptops, desktops, servers, external drives, SSDs, USB media, memory cards, smartphones, tablets, NAS devices, and other company-issued electronic storage media.
- We use NSA-approved degaussing and destruction methods for devices that have reached final disposition, with documentation to support audit, compliance, and legal requirements.

## DIFFERENTIATORS / WHY HIRE CROSSROADS CYBERWORKS

- Lower cost than maintaining an internal forensics lab: We provide on-demand forensic capture and data handling without requiring you to fund full-time forensic staff, specialized lab space, or dedicated equipment.
- Formal chain of custody with real-time tracking: Our process documents custody, handling, transport, evidence intake, device status, and final disposition from pickup through return or destruction.
- Secure, isolated forensic environment: Our lab devices operate as standalone systems and do not connect to the Internet, helping protect client data and preserve evidence integrity.

## COMPANY DATA

UEI: V6C5WRJA1DC4 | CAGE Code: 9LAA3 | Disabled Veteran Owned Small Business

Primary NAICS: 541519 - Other Computer Related Services

Alternate NAICS: 541512, 541611, 541690, 561621
