INTRODUCTION

This is the official 1.0 edition of the MoonPirate business litepaper. We plan to launch a full whitepaper in the coming weeks and months.

MoonPirate is a token based on the Binance Smart chain and is one of the first crypto-tokens which is in collaboration with a real distillery, producing real alcohol. Get Nok LLC are collaborating with MoonPirate to ensure that the vision of MoonPirate holders comes to life in real alcoholic beverages. MoonPirate will not have a liquor license or have any part in the making/selling of alcohol as this will all be performed by Get Nok LLC.

Owning MoonPirate Tokens will provide holders with:

1. The opportunity to vote on a range of options for future alcoholic beverages (type of alcohol, labels, bottles, ingredients etc.)
2. The opportunity to purchase limited edition alcoholic releases
3. The opportunity to enter competitions to win alcohol related products
4. The opportunity to receive potential discount codes for alcohol purchases

TOKENOMICS

MOONPIRATE token has the below Tokenomics:

- 0.8% gets burned forever
- 1.2% automatically gets distributed back to holders
- 2% automatically goes back into liquidity**

**This occurs once the accumulated 2% fees amount to 50 trillion tokens. At this point it will be redistributed back into the liquidity via the contract address in 2 x 25 trillion batches.

All LP Tokens have been 100% burnt forever and ownership was renounced shortly after launch so this project can be community run – 1000 pirate heads are better than one!

MOONPIRATE was a fairlaunch offering with 1 BNB initial liquidity. From the initial 100 Quadrillion Tokens, the distribution was as per below:

- 60% burnt
- 34% to pancake swap liquidity
- 5% to founder
(2.3% of which was awarded to early holders in comps)
(therefore 2.7% remaining with founder)
- 1% to web & graphic designer

MOONPIRATE is available now, only on Pancake Swap!
