Advantages of underfloor heating

- Programmable thermostats provide an inexpensive and effective way to save energy .
- Even warmth & comfort throughout your home or business premises
- Clean & Hygienic
- No dust circulation - excellent for asthmatics & people with allergies
- Environmentally friendly, especially when used with solar, condensing boilers.
- Vandal proof.
- No unsightly radiators
- Complete freedom for innovative interior design
- Link up or add to an existing system e.g. extension or conservatory

Sample of a pipe layout drawing

- Complete wiring & plumbing schematics
- Timesaving - due to ease & speed of installation
- Easy to regulate - due to the compact manifolds
- Little or No maintenance

Complete wireless or wired
temperature control centre.
Controls up to 8 different zones.
