Dear Mounir,

I read with interest your paper on the Ganzfeld protocol and your references to SETI and high-frequency gravitational waves (HFGWs).

Based upon your great interest in HFGWs as expressed at your wonderful luncheon at the Peninsula Hotel, I would like to invite you to be an "International Corresponding, Senior Scientific Advisor, France, " of the "GravWave®Team." Please read the webpage www.gravwave.com. ENTER it and then read the section on the GravWave®Team. If you agree to be a member (no responsibilities except to advise me when you desire, concerning HFGWs), then I would need for you to send me the following: A photo of you and a brief biography. There are examples of biographies on the webpage.

Please advise me if you agree to be a member.

Warm regards to you and Sabrina,

Dr. Baker

FABULOUS – just WONDERFUL!! Thank you so very much for the Video Mounir.

As to your membership on the HFGW Team, we will miss you very much, but I do understand “conflict of interest.” If at any point you feel like returning just let me know!

I did not hear the Soundtrack, but I am sure it is there.

Bob
