Deluxe Edge & Concrete Foundation Options

Deluxe edge & concrete foundation options help flat markers remain visible from grass overgrowth and encroachment. Typically the border size for each option is 4 inches all around the marker.

Deluxe Edge Marker

A deluxe edge marker, shown in the top image on the left, is a larger size marker with a sanded outside border. This is the strongest border option. It also allows for designs to go into the deluxe edge area allowing more room for designs and lettering.

Concrete FoundationMarker

A concrete foundation, as shown in the bottom image on the left, is a granite marker that once made is set into concrete. This is a good option however not as strong as a deluxe edge.
