Wider Home Learning Activities

These activities help children to apply and extend the skills they learn across the curriculum.

Writing tasks (English/History/Geography Links)	STEM Tasks (Maths/Science/DT Links)	Social & Creative tasks (Art, Music, RE, PSHE, PE links)
What everyday products come from the Amazon rainforest? Can you find any in your own home? Make a list and highlight the ones you found in your home.	The indigenous people of the Amazon live off only what they can forage. They make everything they need from the forest. Collect twigs and leaves and see if you can create something that an indigenous tribe could live in. It would be great if you could print or email a picture of what you created!	Create some Amazon artwork without using the colour green! You could consider animals, the river or even different tribes.
Write a setting description for a rainforest. Have you included: 5 sense description; higher level vocabulary; a range of sentence structures?	Identify and classify animals from the Amazon Rainforest into groups. You could use a stem and leaf diagram, a flow chart or your own creation. Don't forget to explain how you categorised them.	Create a musical soundscape of the Amazon rainforest. Consider all the different sounds you might hear. You could record this and email it in or draw a picture of the sounds you would hear.
Write a fact file on the indigenous people of the Amazon rainforest.	There's a magnitude of different plants in the rainforest: some are colourful and small, some are plain but impressively tall but each and everyone has a purpose and function. Design a new plant that serves a function in the Amazon Rainforest.	Create your own fitness plan to help someone live a fit and healthy life. Consider the age of the person and any disabilities they may have. Create a poster for the plan or email a picture of you doing it yourself!
