

Vegetation Management | Land Improvement | Infrastructure Support

Mackay Forestry Mulching Solutions is a Central Queensland-based specialised contractor delivering professional vegetation management, forestry mulching and rural earthworks for government, infrastructure, residential and commercial projects.

Key Services

- Forestry mulching and vegetation management
- Corridor clearing for roads and infrastructure
- Fire mitigation and fuel reduction
- Environmental land rehabilitation
- Integrated weed and invasive plant control
- Site preparation and earthworks
- Drainage and erosion control

Government & Commercial Capability

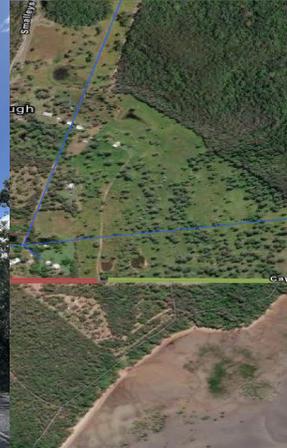

We have worked with Queensland Government agencies such as the Department of Resources, Queensland Hydro and Mining companies such as Peabody and Olive Downs. Also Mackay and Whitsunday Regional councils, developers and infrastructure providers to deliver safe, compliant and environmentally responsible outcomes. Our systems support scalable and reliable project delivery across diverse and challenging environments.

Corridor & Infrastructure Work

We are experienced in working within sensitive environments, including areas near mangroves, waterways, protected vegetation and critical infrastructure such as powerlines and residential property protection. Our low-disturbance forestry mulching techniques minimise soil disturbance, reduce erosion, reduce tree death and retain organic matter, helping to protect surrounding ecosystems and comply with environmental and regulatory requirements.

Corridor & Infrastructure -Imagery

Safety Systems

- Safe Work Method Statements (SWMS)
- Job Safety Analysis (JSA)
- Operator competency and training
- Equipment inspection and maintenance
- Incident reporting and continuous improvement
- Compliance with Queensland WHS legislation

Environmental Responsibility

Our regenerative approach focuses on soil protection, reduced disturbance, erosion control and long-term land and asset performance. We work with environmental specialists to meet and fulfil approvals and all compliance requirements where necessary.

A Sample of Environmental & Regenerative Projects

2023
Department of Resources:
Forestry grade mulch xlarge fire load near residential beach allotments.

2024 to present
