

Heading		Fullness Ratio*	Per Width of Fabric	
			Interlined	Lined Only
Triple Pleat	Also known as French Pleat, most popular choice, gives a very elegant look. Variations available. Recommended for use under pelmets.	2.25 - 2.5	£85 - £95	£75 - £85
Double Pleat	Also known as Dutch Pleat. More streamlined appearance than Triple Pleats, ideal for more modern interiors. Variations available.	2 - 2.25	£80 - £90	£70 - £80
Single Pleat	Also known as Tête de Versailles Pleat. Great for smaller windows or spaces where you want the curtains to pull back neatly.	1.75 - 2.25	£80 - £90	£70 - £80
Cartridge Pleat	Subtle variation of Single Pleat - padded to give a more rounded pleat.	1.75 - 2.25	£80 - £90	£70 - £80
Goblet Pleat	Works well for curtains hung from a pole. Not recommended for small windows or limited space.	2 - 2.25	£85 - £95	£75 - £85
Inverted Pleat	Reverse of Single Pleat, pleats stack at the back, making a 'flatter' heading.	1.5 - 2	£80 - £90	£70 - £80
Box Pleat	Tends to be used on fixed headed curtains as do not stack back well.	2.25 - 3	£85 - £95	£75 - £85
Pintuck Pleat	Pleats are minimal creating very shallow folds, resulting in a much 'flatter' finished curtain.	1.3 - 1.6	£80 - £90	£70 - £80
Hook Pleat	Light to medium weight curtains only, simple option. Not available for interlined curtains.	1.5 - 2	N/A	£65 - £70

***Fullness ratios** determine how much fabric is needed for each curtain heading in order to achieve the best drape.

E.g. to calculate make up fees for: Full length, triple pleat headed interlined curtains

- Decide the type of heading you would ideally prefer (if unsure, I recommend going by double pleat as standard), **e.g. triple pleat**
- Look at the table to find the ideal fullness ratio for your chosen heading, **e.g. triple pleat = 2.25 ratio**
- Measure the width of your window, adding 20cm to each side, if possible, to find pole length, **e.g. 160cm + 20cm + 20cm = 2m pole length**
- Multiply the pole length by the fullness ratio, **e.g. 2m x 2.25 = 4.5m**
- Divide this total by 137cm (a standard fabric width) and round up to nearest whole number, **e.g. 4.5m/137cm = 3.28 = 4**
- This gives you the number of drops required in order to achieve the desired look, **e.g. 4 drops**
- Look at corresponding prices per drop on the chart, **e.g. 4 x £95 = £380 labour fees**

In our example, this means we would need 4 drops of fabric = £380 curtain make up fees

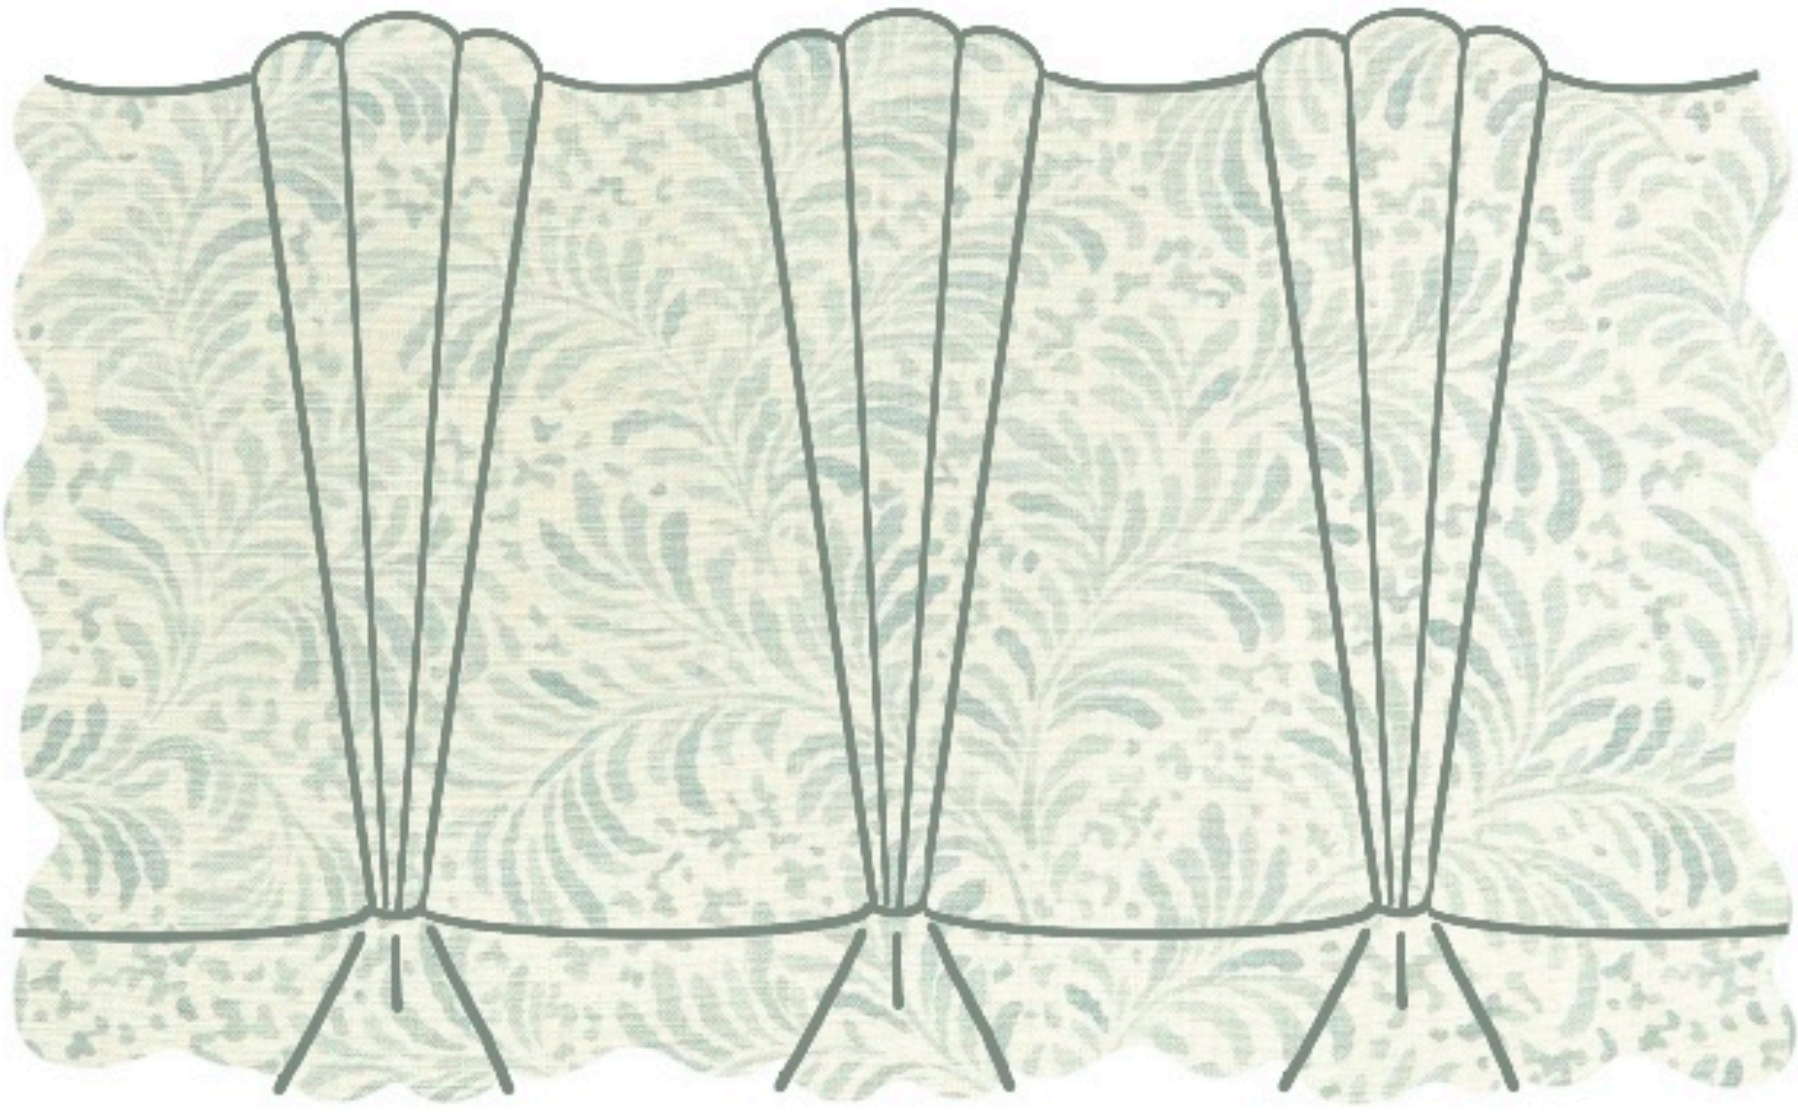

See below for a guide to add-on fees

Roman Blinds	Cascading, interlined (double lined)	Prices start from £115
	Cascading, interlined with sewn pelmet	Prices start from £125

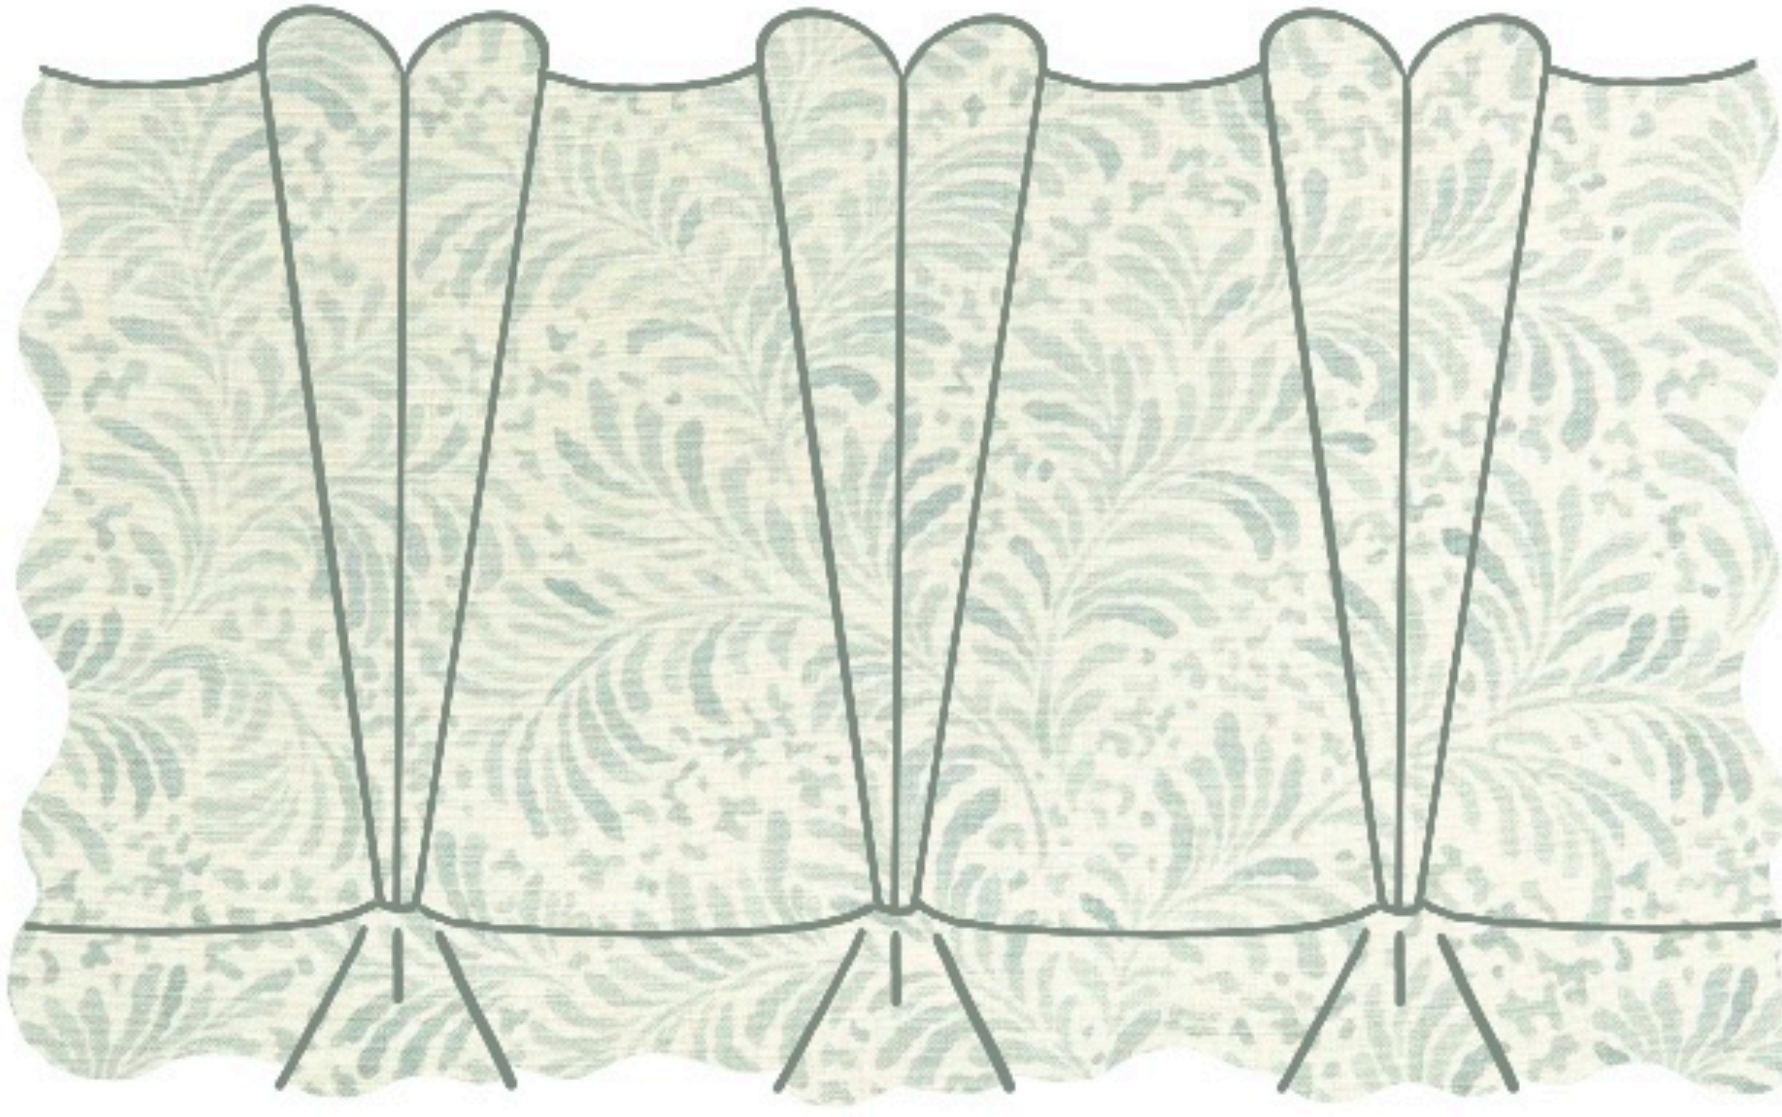

Hand sewn Border	Applies to curtains, blinds & pelmets	Prices start from £15 per metre of trim/ border rounded up to nearest 0.5m
Hand sewn Trim		

Cushions		Prices start from £25
Pelmets		POA
Lampshades/Lighting		POA

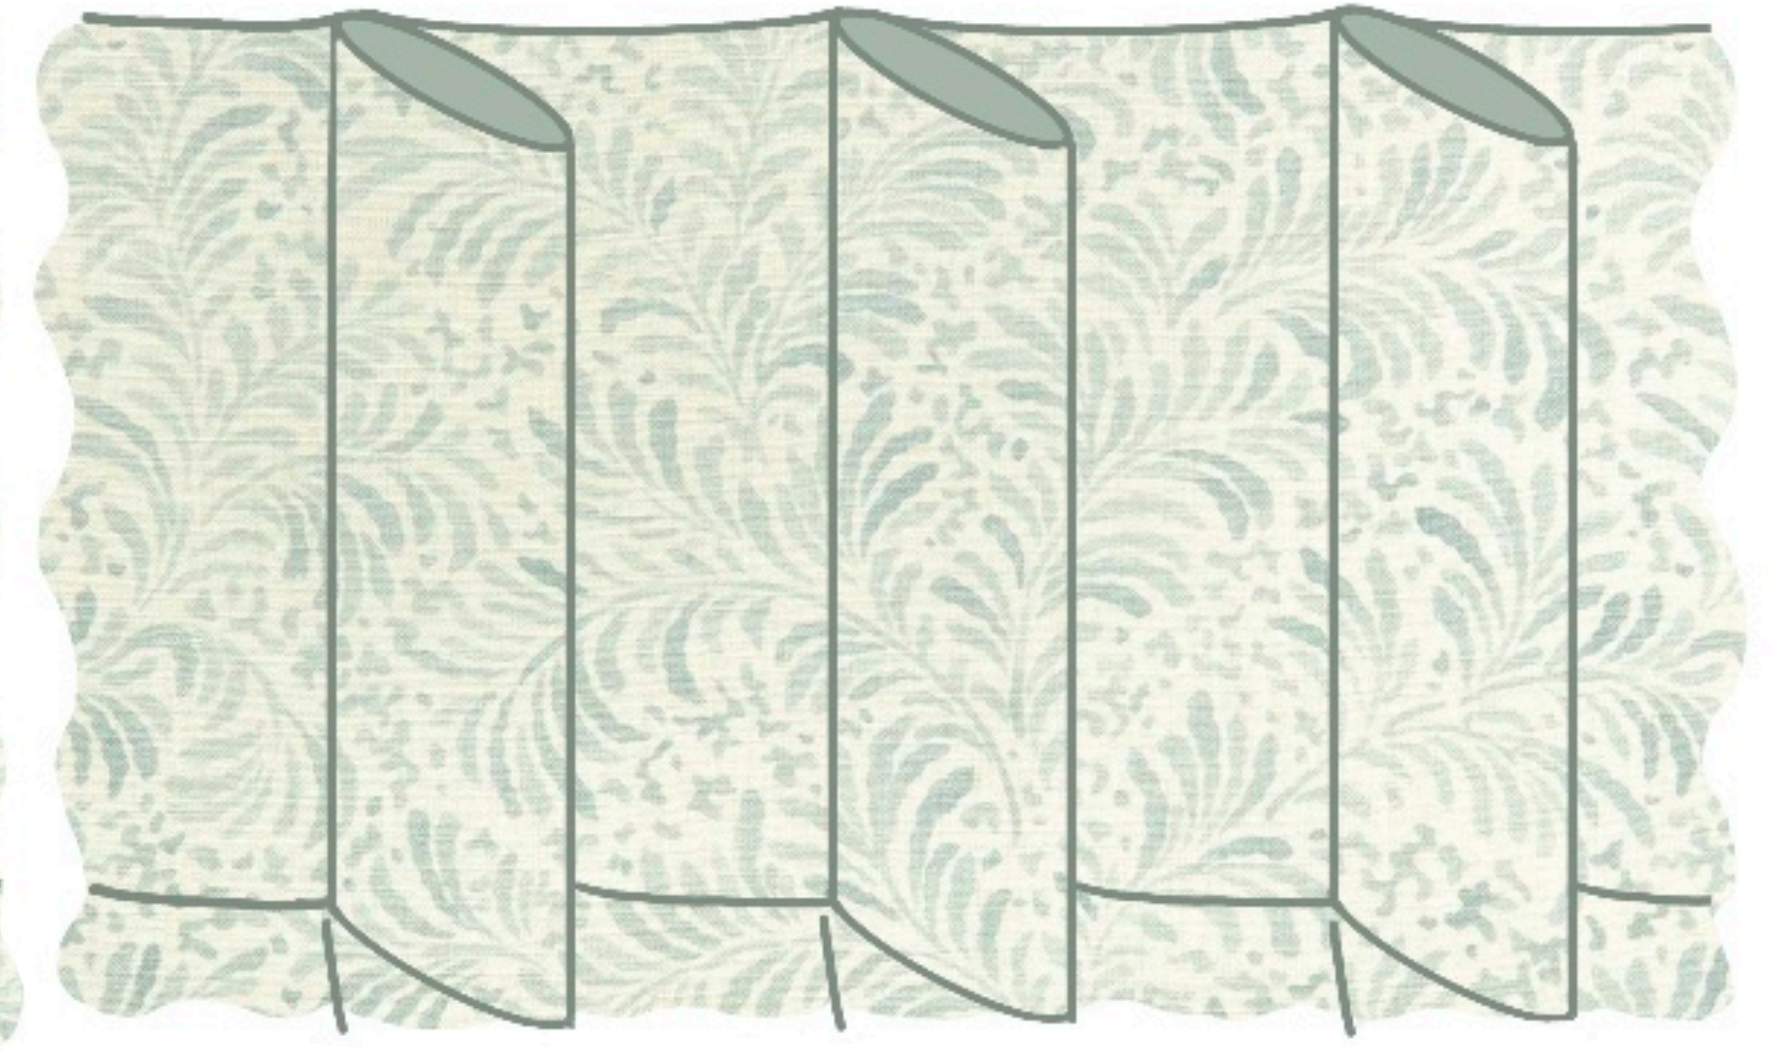

Fabric Suggestions/Sourcing	Fee charged for sourcing suitable fabrics on your behalf. Can on occasion be fully or partially waived.	£127
Surcharge	Applied to labour costs if I am unable to source fabric or you wish to use your own. Can on occasion be fully or partially waived.	Minimum 25%
