# MONUMENT TYPES

**FLAT/GRASS MARKER**

**BEVEL MARKER**

Flat and bevel markers sit either on a cement pad, directly on the ground, or are sometimes set into the ground.

**DIE (SERP TOP)**

**DIE (FLAT TOP)**

Upright markers, or dies, are available in flat top, serp top, or oval top. Upright markers require a granite base which can have smooth (sawn) edges or rough rock (broken) edges. Sawn edges have the option of being polished. The base can be the same colour as the die, or different depending on your preference.

**SLANT MARKER**

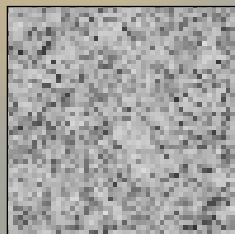

Slant markers are available in flat top, serp top, or a rounded oval top.

# ADD ONS

## PHOTO INSERT

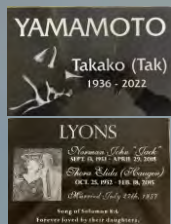

We can add an enameled steel portrait of your loved one to their monument. Our photo inserts come in various sizes from 2"X3" up to 8"X10. They are extremely durable and have a life time warranty. We can always get a replacement if they are damaged.

## CUSTOM DRAWING

If you have a image near and dear to your heart and would like to see it featured on your loved one's monument, our artist can draw it and recreate it on the headstone.

## LASER ENGRAVING

Portraits, and images that require a little more finesse, can be laser engraved on to the granite surface. After engraving we add either black or white colour to help the image stand out. Laser engraving works best on flat or bevel markers. We can laser engrave large and upright markers, but there may be a longer wait time.

# ADDITIONS

If you need an inscription added to a monument, we can do an addition on site at the cemetery, or in house. This is a flat rate that includes all text. Art can be added at an extra cost.

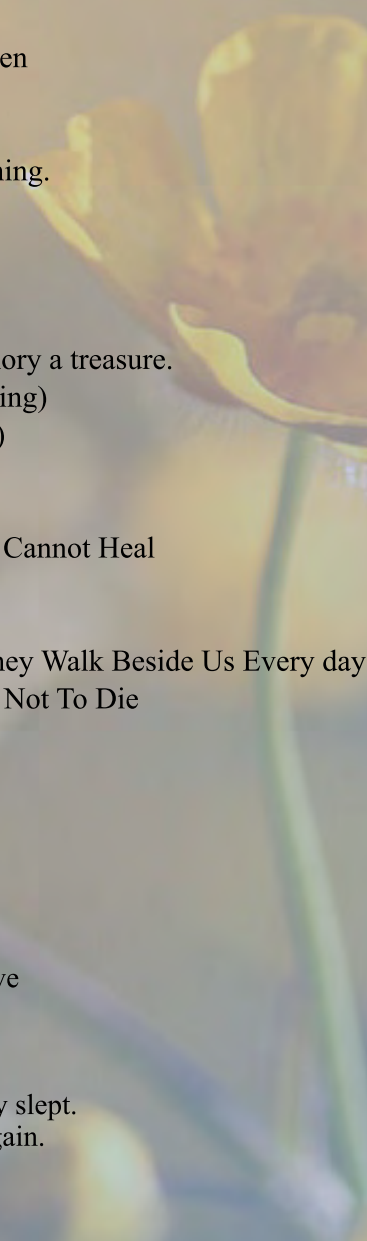

# RESTORATIONS

If you have a monument that needs to be restored to its former glory, you may want to consider a restoration. A restoration included a professional cleaning, repainting, and protective coating. It is a flat rate service that can be completed onsite or in house.
