SCHWIMMBAD & THERME
YOUR FULL-SERVICE
SWIMMING POOL PROVIDER

WATER

ELEMENT OF LIFE

Water is life. Without water, our daily well-being, our health, nutrition, energy supply, and the provision of everyday goods would be impossible.
GWT stands for this very foundation of life.

GWT GROUP

OUR HISTORY

1987 — Founding of GWT

In its early stages, GWT developed into a competent plant manufacturer both domestically and abroad. Continuous operational expansions and mergers enabled the company over the years to establish a reputation as a turnkey provider in water treatment and heat technology.

2005 — Founding of GWT Wasser- und Wärmetechnik

GWT Gesellschaft für Wasser- und Wärmetechnik GmbH was established with the takeover of Wassertechnik Ges.m.b.H. & Co. KG, located in Salzburg. A competent team covers every aspect of plant construction.

2013 — Founding of GWT Schwimmbad und Therme

GWT Gesellschaft für Wassertechnik Schwimmbad und Therme GmbH was established as the center of excellence within the GWT Group for the pool division, aiming to consolidate know-how and reinforce it for long-term future success.

2014 — Graz and Braunau

Through the establishment of two further locations and the introduction of building services and electrical engineering divisions, market presence and service quality were improved.

2019 — GWT Swiss AG

With the establishment of GWT Swiss AG following the transition from Hydroair AG, the Swiss market was successfully accessed and further technical know-how was acquired.

2022 — GWT Aquatech and GWT VerticalFarmTec

With the establishment of GWT Aquatech, entry into the Slovenian market was achieved. VerticalFarmTec GmbH has specialized in end-to-end solutions for agrotechnology and facility engineering in the field of vertical farming.

OUR VALUES

Customers

Our clients and their specific needs are our top priority.

Quality

We set the highest quality standards for ourselves and our products.

Employees

High-quality training and professional development are just as central to our philosophy as fair, performance-based compensation.

Environment and Innovation

Environmental protection is a top priority for us. We contribute to this through the responsible selection of products as well as resource-conserving planning and implementation.

We regard technical design in accordance with the latest technology and the continuous improvement of our services as our duty.

SWIMMING POOL ENGINEERING

▸ WATER TREATMENT
▸ CONTROL & DOSING SYSTEMS
▸ AUTOMATION & REMOTE MONITORING

Our Scope of Services

- Water treatment for swimming pools of any size
- Design and construction of vacuum and pressure filter systems
- Installation of ozone treatment systems
- Construction of chlorine gas systems including comprehensive training and long-term support
- Design and installation of measurement, control, and dosing systems
- Design and setup of fully automated systems with remote monitoring and visualization
- Engineering and installation of technology for aquatic attractions, such as water slides
- Long-term maintenance and ongoing support for your facility

Experience & Expertise

With over 30 years of experience in water treatment, we are proven specialists in outdoor pools, indoor pools, and wellness facilities. You can also rely on our team's expertise when it comes to thermal water treatment.

Durable & Low-maintenance

Our water treatment technology complies with the highest international standards and delivers reliable performance with minimal maintenance. Our portfolio ranges from manually operated units to fully automated systems with remote monitoring and visualization.

We implement projects of any scale—whether utilizing proven standard processes or developing customized, tailor-made solutions.

Tailored Planning & Implementation

As a technical general contractor, we manage both preliminary and detailed design. Our experienced project managers are ready to assist you in designing liner, tiled, or stainless steel swimming pools.

Maximum Flexibility & Efficiency

Whether concrete with membrane liner, concrete with tile, all-stainless steel, or a hybrid combination within a single project, our experts turn your pool concepts into reality.

Our extensive background in process coordination, engineering, and construction serves as a key driver of efficiency throughout the entire project lifecycle. It enables us to select premium, mature, and field-tested components, guaranteeing extended service lives and optimized maintenance requirements.

Our Scope of Services

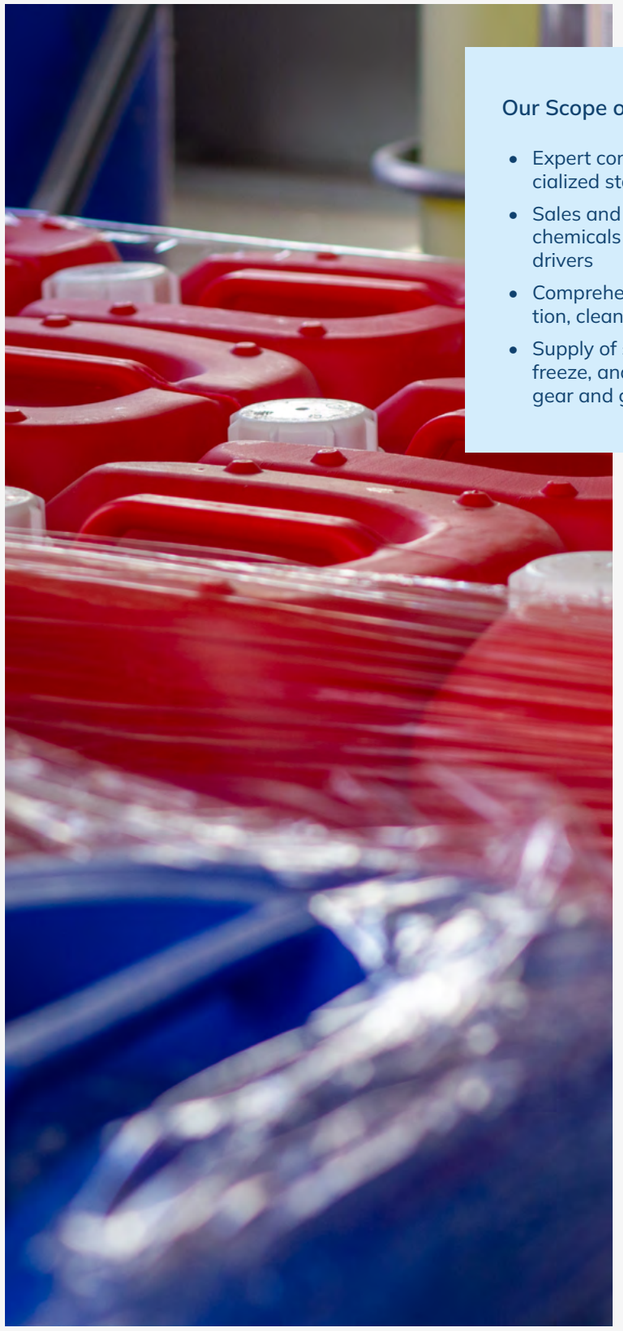

- Conceptual design, planning, and construction of turnkey aquatic facilities for municipalities, hotels, commercial clients, and private customers
- Refurbishment, modernization, and new construction of outdoor, indoor, and combined pools as well as thermal spas
- Project coordination and management
- Pool basins in tile, liner, or stainless steel
- Installation of aquatic attractions, including water slides and diving platforms
- Aftercare and ongoing support following project completion

CHEMICAL SUPPLY

DESINFECTION ◂
CLEANING ◂
CONDITIONING ◂

Our Scope of Services

- Expert consultation by our field sales team and specialized staff at regional chemical supply centers
- Sales and flexible delivery of essential operational chemicals via our dedicated fleet and certified ADR drivers
- Comprehensive product portfolio covering disinfection, cleaning, and water conditioning
- Supply of specialty chemicals such as glycerin, antifreeze, and related products, as well as protective gear and general pool accessories

High Quality & Customer-oriented

Our specialized staff at our regional chemical branches provide expert advice on our comprehensive product portfolio as well as your operational options and regulatory requirements.

Flexibility through our dedicated fleet

Regional warehouses and our own company-owned fleet allow us to deliver chemicals flexibly according to your schedules. Even during peak seasons, close cooperation with dependable logistics partners guarantees accurate and punctual deliveries.

Comprehensive Range

Our offering covers everything from pool water disinfection agents and conditioning products - such as flocculants, winterizing chemicals, and algaecides - to specialty cleaning agents developed specifically for swimming pools.

In addition, we provide a selection of specialty chemicals, including glycerin, antifreeze agents, and related products. Personal protective equipment (PPE) and general pool fittings and equipment are also available directly through GWT.

SERVICE

▸ PROFESSIONAL SERVICE & SUPPORT
▸ RAPID ASSISTANCE
▸ REGULAR MAINTENANCE

Prompt & competent

Our highly trained service team provide top-tier swimming pool service - from rapid call-outs in the event of technical malfunctions to regular maintenance and comprehensive support for entire facilities.

A 24/7 on-call emergency service guarantees our customers expert assistance all year round, even outside regular business hours.

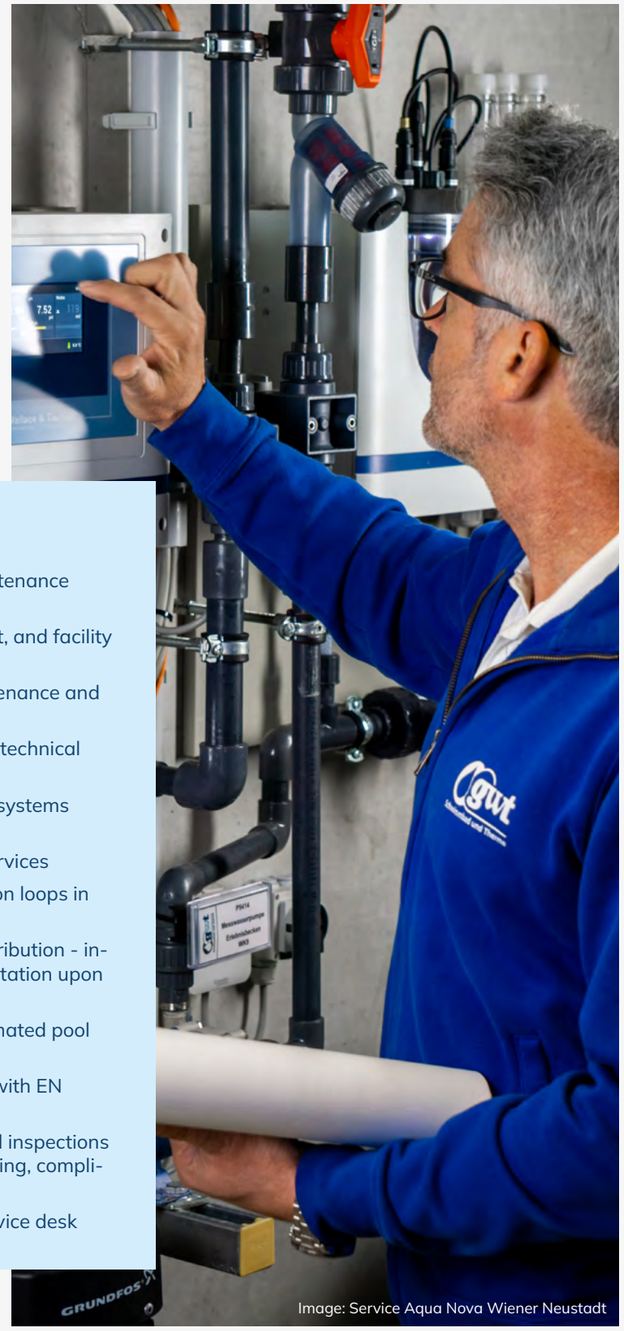

Image: Service Aqua Nova Wiener Neustadt

Our Scope of Services

- Execution of regular servicing and maintenance throughout all technical plant systems
- Comprehensive plant operation, support, and facility management
- Standard-compliant chlorine gas maintenance and operator safety training
- Troubleshooting and rapid resolution of technical malfunctions
- Repair works on equipment and piping systems across a wide range of materials
- Filter media replacement and top-up services
- Disinfection of filter media and circulation loops in cases of bacterial contamination
- Spare parts supply and component distribution - including installation and technical consultation upon request
- Sales, maintenance, and repair of automated pool cleaners
- Hair entrapment testing in compliance with EN 13451
- Facility evaluations and expert technical inspections for aquatic facilities (e.g., dye tracer testing, compliance audits under ÖNORM M 6216)
- Technical telephone support via our service desk

ENERGY-SAVINGS-CONTRACTING

ENERGY EFFICIENCY ◂
COST REDUCTION ◂
REFINANCING ◂

Innovativ & sustainable

Through Energy-Savings-Contracting, we analyze your facility's energy status and develop targeted measures to boost energy efficiency and lower utility costs.

How it works & Process

Based on your current energy consumption (typically calculated from the past three years' usage) and the measures developed, specific savings targets are guaranteed to the client within the Energy-Savings-Contracting-Agreement.

GWT Contracting GmbH finances and implements the measures to improve energy efficiency.

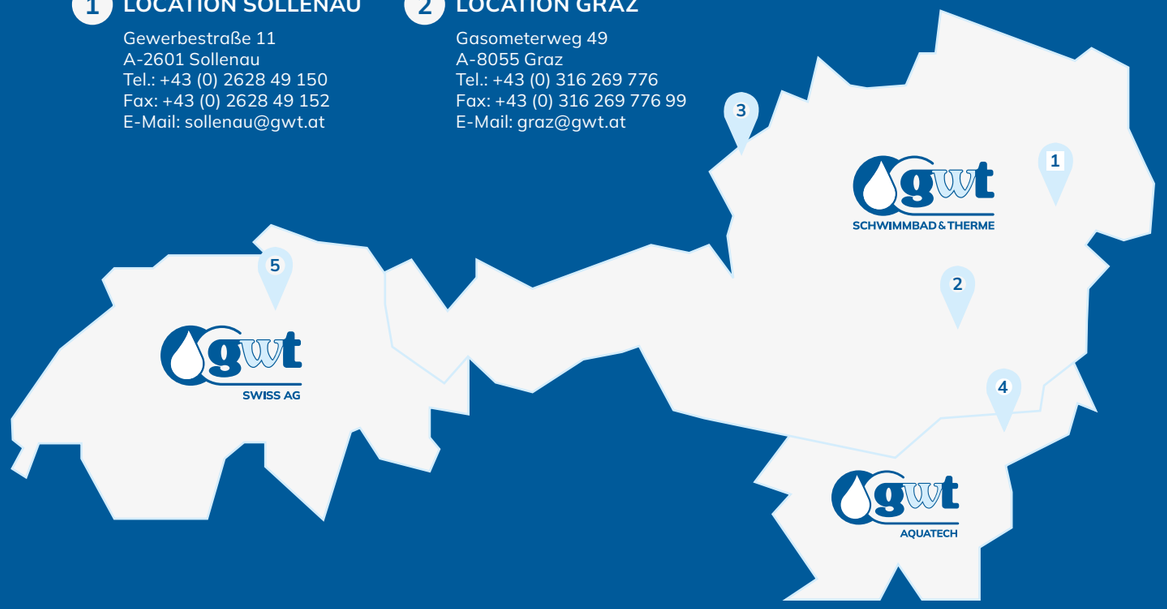

Refinancing is achieved directly through the realized savings as defined by the contract. Once the contract term concludes, the full ongoing energy savings benefit the client directly.

GWT Contracting GmbH

Energy-Savings-Contracting provided by GWT Contracting GmbH, a 100% subsidiary of GWT Gesellschaft für Wassertechnik Schwimmbad und Therme GmbH, offers a proven path to lowering your building's utility expenses without financial risk. The company invests in the turnkey execution of the agreed energy efficiency measures, while the generated cost reductions serve to refinance the capital expenditure incurred.
