

SomaChairs.™

The only chairs with features clinically proven to help reduce and prevent Repetitive Strain Injuries.

Based on New & Clinically Proven Research

For over 15 years on three continents, we at Soma have had the privilege to work with world-class physicians, clinicians and ergonomists who have developed methods that have been independently confirmed to best reduce repetitive strain and back injuries. They have identified specific features for ergonomic chairs that can help you best attain optimal back support, muscle relaxation, repetitive strain injury prevention, and higher levels of comfort, health, performance and productivity.

NOW SOMA OFFERS THE NEW SOMACHAIRS™ WITH THESE EVOLUTIONARY FEATURES --
FEATURES CLINICALLY PROVEN TO HELP YOU FEEL GREAT, NOW AND FOR YEARS TO COME!

Better Features. Better Support. The Two-Part™ Seat, Thor-Sac™ Back Support Advantage and More.

Soma's real ergonomic products have the features which practicing clinicians have found most effective in reducing symptoms and preventing lower back pain and repetitive strain injuries: Features like our Two-Part™ Seat, providing the best spinal alignment and natural posture support; Thor-Sac™ Back Support, providing the best back support for reduction of static muscle tension in the upper back, neck, and shoulders; and a Quick-Release lever, making back height adjustment a snap. And these are just a few of the innovative features that add up to the best ergonomic support you can get to enhance your comfort, health and performance. **PROVEN!** For more information or to arrange for a free test drive, call us today.
