CAPABILITIES

- Stormwater drainage
- Sewer and water live connections
- Sewer and water reticulation
- Sewer and water hydraulics
- Road construction
- Bulk earthworks
- Detailed earthworks
- Concrete form works
- Material haulage
- Site management

DIRECTOR & COMPANY

Lochlan Spencer has 12 years of experience in the civil industry, with a focus on both groundwork (drainage and pavement) and office skills (quality assurance, construction programs, client liaison etc). Lochlan always dreamt of starting his own civil company and on the 8th of June 2022 Spencer Civil & Earthworks officially began.

Today, Spencer Civil & Earthworks employs 18 permanent staff, including an experienced foreman, Mark Campbell, who has 17 years in the industry. We have a fleet of GPS-equipped machinery, including excavators 5-50ton, rollers, trucks, dozers, and graders, operating in both Queensland and the Northern Territory.
