Parking & Access

Street parking is available throughout the neighborhood, and several public parking garages are within a short walking distance.

Our corner-unit entrance is at street level for easy access.

About Chantique Med Spa

Chantique Med Spa is a boutique medical aesthetics and wellness practice located in Portland's Pearl District, where science, artistry, and personalized care come together.

Founded by board-certified Family Nurse Practitioner Paige Haley, Chantique was built on the belief that aesthetic medicine should enhance your natural beauty—not change who you are. Our goal is to help you look refreshed, feel confident, and age gracefully through thoughtful, evidence-based care.

Every treatment plan is tailored to your unique anatomy, goals, and lifestyle because no two patients are alike. We believe in honest recommendations, natural-looking results, and creating a welcoming environment where you'll never feel pressured into treatment.

Whether you're looking to restore collagen, improve skin health, optimize your wellness, or feel more confident, we're here to help you become the healthiest, most confident version of yourself.

Why I Chose the Pearl District

The Pearl District was already my home, so I wanted to open my business in the area I love and know. I wanted Chantique to be part of a neighborhood that values wellness, community, creativity, and supporting local businesses. The Pearl has such a welcoming, walkable atmosphere, and I love that people come here not just to shop or dine, but to connect with the community. It felt like the perfect place to build a practice centered on relationships and personalized care.

A Little About My History

I'm a board-certified Family Nurse Practitioner with 20 years of hospital nursing experience and nearly ten years specializing in aesthetic medicine. Before entering aesthetics, I worked in emergency medicine, where I developed a deep appreciation for compassionate, patient-centered care.

Opening Chantique has been a lifelong dream. It allowed me to combine my medical background, artistic eye, and passion for wellness into one practice where patients receive individualized, evidence-based care in a calm, boutique environment.

What I Love Most About the Pearl District

The sense of community. The Pearl is filled with incredible locally owned businesses that genuinely support one another. There's always something happening—from neighborhood events and art galleries to farmers markets and small business collaborations. It's inspiring to be surrounded by passionate entrepreneurs who care deeply about the community they've built.
