SAMRMS Records Management System

SAMRMS is a comprehensive RMS with advanced intelligence analysis and tracking.

SAMRMS capabilities include:

Incident Reporting	**Intelligence Analysis**
Streamline reports with ease and accuracy.	Uncover hidden connections and map crime.
e-Citation	**Court Management**
Issue citations quickly and minimize paperwork.	End-to-end municipal court processing.
Evidence Management	**CI and Case Funds Management**
Secure, track, and organize evidence efficiently.	Track confidential funds and informants with precision.
Case Management	**Complex Investigation Mgmt**
Simplify case tracking from start to resolution.	Manage conspiracies, gangs, and other complex investigations.

SAMRMS also enables your investigators to submit incident and arrest reports to the state. When combined with the MSAT system, SAMRMS helps investigators efficiently solve cases by analyzing ALL the collected data.

Additionally, at **no extra charge**, we:

> Customize SAMRMS to your agency's specific needs
> Connect with your other databases and systems

Computers & Mounting Equipment

Through our longstanding partnerships, Derry offers our clients the best, most cost effective products available from the top hardware providers for law enforcement.

Asset Management/RFID

Our RFID solutions are a powerful upgrade from traditional bar codes. You can capture 1,300 tag reads per second – without opening containers or even getting within 20 feet of what you're scanning.

In partnership with Zebra Technologies and RedBeam, Derry's RFID-powered asset management solutions provide:
> Secure chain-of-custody documentation
> Real-time and accurate inventory quantity, location, and condition
> Simple, mobile counting process
> Easy set up/intuitive SaaS platform
> Increased accountability by tracking asset condition to assigned user
> Detailed inventory reports

Zebra's rugged RFID readers and tags ensure durability in high-stakes environments. RedBeam's cloud-based software centralizes asset data with customizable dashboards and compliance reporting.
