BLACK INFUSION BULL SALE

Two Proven Programs. One Benchmark Sale.

Wednesday 11th of March 2026 at 11:30am

All cattle sold by Auction

Boyanup Saleyards ~ 31 Salter Rd, Boyanup WA 6237

Inspections start at 9am. Food & beverage available.

Online Bidding available via  **AuctionsPlus**

Buy and Sell stock nationally

**Welcome to Black Infusion, the first-ever combined bull sale uniting
Bullock Hills Simmentals and Gumnut Downs Angus.**

This landmark event brings together two progressive breeding programs to present a powerful offering of black Simmental and black Angus genetics, purpose-bred for modern commercial operations.

Bullock Hills will offer 26 performance-driven black Simmental bulls (12 rising 2 y.o. and 14 yearlings), along with two lots of three heifers, selected for growth, structural integrity, and commercial efficiency.

Complementing this draft, Gumnut Downs Angus will present 9 black Angus two-year-old bulls and 2 nineteen-month-old bulls, carefully selected for fertility, temperament, and real-world commercial relevance.

Black Infusion represents a shared commitment to producing functional, paddock-ready cattle—built to perform, adapt, and deliver confidence for commercial and seedstock producers.

Join us for a sale that sets a new benchmark in quality, consistency, and confidence.

Bullock Hills is a Black Simmental stud business located in Katanning WA, established in 1995.

Welcome to the Bullock Hills 4th Annual Production Sale.

This year marks an important milestone for Bullock Hills, as we proudly present our first offering of an entirely Black cattle lineup. Following the dispersal of our Traditional herd, our breeding program is now fully focused on the development of high-quality Black Simmental genetics.

To accelerate our breeding objectives, we have continued to flush our best young females through embryo transfer programs, while the majority of the herd has been joined via AI to proven, high-performing imported sires.

The majority of the offering is sired by Gibbs Essential 9114G and OMF Epic E27. Additional sires represented include LRS Dutton 611K, RF Caliber 014G, TJ Gold 274G, and Bonnydale Broad Range T122. Each of these sires has been meticulously selected to complement the Bullock Hills breeding program, contributing proven, consistent, and commercially relevant traits that promote a uniform and versatile herd.

All lots have been DNA verified and genomically tested for horn, colour, and poll status. Every bull offered has been rigorously assessed on the hoof and is supported by accurate and reliable Estimated Performance Data (EPDs). These figures have been presented in a clear, easy-to-interpret format, highlighting the key strengths of each sire. As requested, bulls suitable for heifer mating and dual-purpose use have been clearly identified.

BULLOCK HILLS
BHS
SIMMENTAL

Founded 1995

Over the past decade, the genetic progress of the Bullock Hills herd has been carefully monitored, with trends graphed in this catalogue to provide clients with insight into expected future progeny performance. Consistent improvement across key productive traits has been evident on-farm, with calving ease, growth, carcass quality, and finishing ability firmly embedded into the program—resulting in cattle that are both productive and easy to manage. Further analysis and insight into these trends has been provided by Tom Granleese, PhD, Animal Breeding and Genetics (NSW).

Videos and photos of the sale bulls will be available on AuctionsPlus and our website. While we will not be holding an open day this year, private inspections are warmly welcomed prior to the sale.

We sincerely thank all past purchasers for their support. Our ongoing aim is to breed honest, reliable cattle and to assist fellow breeders on their journey toward a profitable and rewarding future. Please do not hesitate to contact Brad should you require any further information or assistance.

Brad, Sylvia and Family.

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select **"Sign Up"** in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select **"Dashboard"** and then select **"Request Approval to Buy"**.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

10 Year stock-take on genetic trends

Bullock Hills Simmentals uses strict, uncompromising phenotype selection on our herd. Secondly, using objective measures of breeding values (EPDs) helps Bullock Hills quantify what we see with our eye as well as assist in selection.

Bullock Hills Simmentals has a balanced breeding objective of selecting correct, easy doing, maternal Black Simmentals that have the ability to finish on pasture or the feedlot. You will see a very even line of bulls that will improve your on farm profitability. Our genetic trends provided by Simmental Society of Australia demonstrates Bullock Hills are making long-term (10 year averages) gains in all profit driving traits as observed in table. Long term genetic progress at your sourcing stud is important because those trends flow into your herd as you purchase bulls. It is important to remember that you don't buy the grain bin the bulls come from and rather you are paying for a mobile semen delivery device and upon delivery they not only create a calf, but enhance the performance of the calf through its selected genetics. Genetic gain is permanent and cumulative - like compound interest. Bullock Hills have demonstrated an objective measure of gains through their genetic gains. A question you should ask yourself is, if you were offered 1% interest at a bank vs 5% interest at a bank, which bank would you choose to invest your money? The same goes with breeding enterprises. You can observe the genetic improvement over 10 years in the table and/or the annualised rate of change. For our long-term clients, these gain will be flowing through your herds.

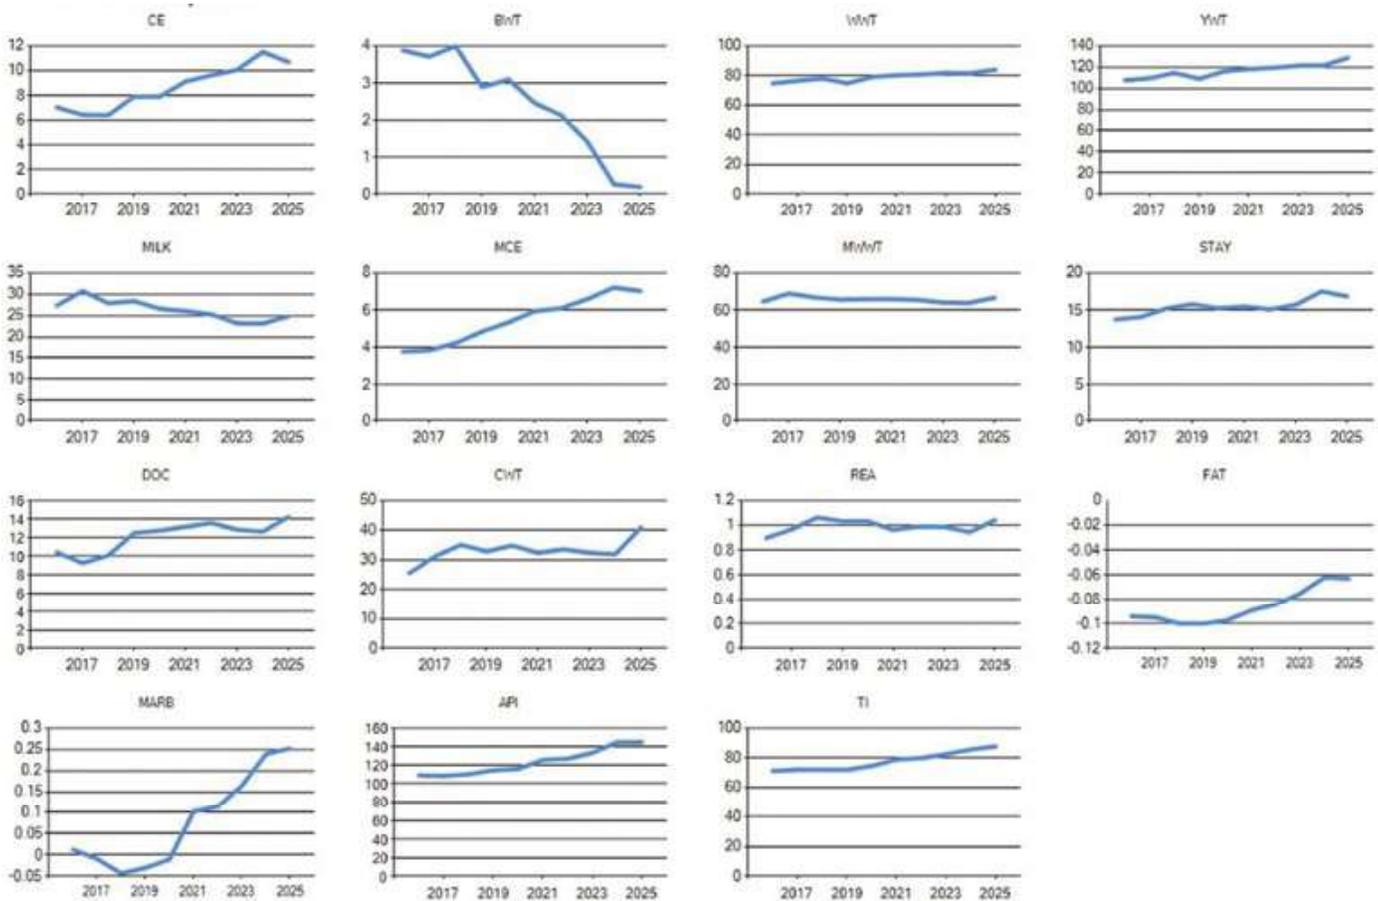

Highlights include long-term annual improvements in breeding values:

- **5% calving ease** --> More options to mate over heifers, faster post-anoestrus recovery to cycle sooner after calving
- **8% maternal calving ease** --> Daughters are having less calving difficulty
- **2% yearling weight** --> Hitting feeder weights earlier to reduce time on-farm
- **2% Stayability** --> Ability for daughters to stay in herd
- **6% Carcase weight** --> Bigger carcasses means either earlier target weights to reduce time on-farm and/or larger carcasses
- **3% Rib fat** --> Ability to lay fat during recovery post-weaning. Critical to go back in calf the following year
- **rapid increase marbling** --> As processors are now paying for grid specs, you are able to capitalise on larger Simmental carcasses while attracting marbling premiums.
- **3% profit index** --> More profitable animals being bred means more dollars in your back pocket keeping beef cattle a viable operation in your business.

By choosing a single or and team of Bullock Hills sires, you can be reassured that the bull(s) are being produced to increase permanent and cumulative long-term gains both from a phenotype and data driven point of view.

... and what that means for you
