

Cavoodle Care Sheet

A quick reference guide for keeping your Cavoodle happy, healthy, and well-groomed.

Quick Facts

Trait	Details
Size	Small to Medium (5–12 kg)
Height	25–38 cm at the shoulder
Lifespan	10–14 years
Coat	Soft, wavy, low-shedding
Temperament	Affectionate, friendly, intelligent
Best For	Families, singles, apartment dwellers
Exercise Needs	30–45 mins daily + playtime

Cavoodle Care Essentials

Training & Socialisation: Use positive reinforcement. Keep sessions short and fun. Socialise early with people, pets, and different environments.

Exercise: Daily walks plus mental stimulation. Fetch, puzzle toys, and playtime help prevent boredom.

Grooming: Brush 2–3 times weekly (daily for curly coats). Professional grooming every 6–8 weeks. Clean ears regularly.

Health: Watch for ear infections, dental issues, patellar luxation, and heart conditions. Regular vet check-ups are essential.

Diet: High-quality dog food. Adults: 2 meals/day. Puppies: 3–4 small meals/day. Avoid toxic foods like grapes, chocolate, onions.

Family Suitability: Great for families, singles, retirees. Not ideal for owners who are away most of the day.

Max's Comment: *"They look like teddy bears, but don't be fooled — slack off on training and they'll run circles around you."*
