| Coat | Double coat with wiry outer layer |
| Temperament | Alert, intelligent, loyal |
| Best For | Families, singles, active seniors |
| Exercise Needs | 45–60 mins daily |

Miniature Schnauzer Care Essentials

Training & Socialisation: Highly intelligent and eager to please. Use positive reinforcement and introduce socialisation early.

Exercise: 45–60 mins daily. Include walks, playtime, and training exercises to keep them stimulated.

Grooming: Brush 2–3 times a week. Professional grooming every 6–8 weeks to maintain their signature look.

Health: Prone to pancreatitis, eye conditions, and bladder stones. Choose a breeder who health tests.

Diet: Balanced, high-quality diet. Adults: 2 meals/day. Avoid high-fat foods to reduce pancreatitis risk.

Family Suitability: Playful and affectionate — great with children and adaptable to apartment or house living.

Max's Comment: "Small but mighty — they'll guard the house, chase the ball, and still expect to sit on your lap like they own it."
