

## Get paid quickly, easily, and safely.

Bridge™ Payments helps practices realize more revenue.

Bridge Payments is a simple, safe, and secure payment solution for healthcare providers. This turnkey technology interfaces seamlessly with your current EMR system, allowing you to easily track, manage, report, and reconcile patient payment information.

### Bridge Payments

- ✓ Offers convenient, contactless payment solutions.
- ✓ Interfaces seamlessly into any practice management system.
- ✓ Expedites payments before, during, and after care.
- ✓ Replaces outdated processes with digital automation.
- ✓ Stores patient data in a reliable, secure backend.
- ✓ Allows for functionality to be leveraged across locations.
- ✓ Improves communication between practice and patients.
- ✓ Implements quickly with easy, remote installation.

# Bridge™ Payments helps practices realize more revenue.

---

From digital registration to contactless payments, Bridge Payments is everything you need to enhance the patient experience. Saving time, money, and effort, its easy-to-use payment management and posting tools improve office efficiency and practice profitability.

## Key Features

### Text to Pay

Allow patients to make online payments through text message links.

### Card on File

Safely store preferred payment information for future charges.

### Contactless Capabilities

Accept Apple Pay®, Google Pay™ and Samsung Pay® for touch-free payments.

### Flexible Payment Plans

Make financing manageable by offering smaller payments over time.

### Automatic Posting

Easily post payments to the patient ledger in your practice management system.

### Online Payments

Accept payments on your website and share the link on emails and statements.

### Digital Patient Registration

Let patients fill out forms electronically before visits through a text or email link.

### Customizable Messages

Send patients reminders, outreach, billing notifications, and more in text messages.
