

The Saver Group

NOT FEELING PUMPED ABOUT ENERGY PRICES AT AN ALL TIME HIGH?

**SAVE UP TO
78%
ON YOUR
HOT WATER
HEATING
BILL NOW!**

There's never been a better time to upgrade your electric hot water system to an energy efficient Heat Pump which could cost you **NOTHING (\$0)*** under the NSW Energy Saving Scheme.

With hot water accounting for up to 30% of our energy bills throughout Autumn and Winter, no wonder businesses and households right round Australia are looking for alternatives that are friendly to both the environment and the wallet.

And this is as good as it gets!

The Saver Group only promotes and installs the highest grade products on the market which also include long warranties.

Our Heat Pumps far outstrip the following hot water systems:

Electric Storage • Gas Storage • Gas Instantaneous • Solar Electric Boosted

Our Heat Pumps could cost you NOTHING (\$0)* under the NSW Energy Saving Scheme.

How Heat Pumps work

A fan draws air even if the surrounding air is cool.

The air becomes gas

The evaporator turns the liquid refrigerant into a gas. Then the compressor pressurises the refrigerant into a hot gas.

Hot water with gas

Hot gas inside the condenser coil heats the water inside the tank.

The refrigerant reverts back to a liquid

After heating the water, the unit repeats the cycle again.

Air to water Heat Pumps

An assessment will be conducted prior to commencing work.

**Nothing (\$0) is for the supply and install of the unit in place of the existing outdoor unit.*

Additional costs may be incurred for unit relocating, extra plumbing, electrical work and concrete slabs if required.

**THIS OFFER
IS HOT!
DON'T MISS IT**

There's never been a better or more important time to keep your energy bills low.

Start saving today by taking advantage of the hot water incentives while you can.

You'll never look back!

Hurry! Secure your Heat Pump now!
