## WHAT WE'RE LEARNING

### Pioneers

In the Pioneers we have been using our senses to explore the World, created our own Nativity and ended the term with an epic Grinch Jelly Battle.

### Discoverers

We have taken part in team building activities, developing the outdoor space, Christmas baking sessions, remembrance parade, pantomime and grinch day jelly fun!

### Explorers

We have been learning about pH and how to test whether something is an acid or alkali, writing scary stories and working with decimals.

### Developers

The Developers have been working on their English Functional Skills, percentages and decimals and how to write digital music. We went skating and won a copybara toy.

### Founders

Founders have been learning about sustainability and how we as a school can improve our carbon footprint and exploring different foods and food preparation techniques.

## ACTIVITY FOCUS - ICE SKATING

Upper school went to Nottingham Winter Wonderland and went ice skating! They all had a fabulous, if slightly damp time and most managed at least one full lap of the sky rink!

## YOU SAID : WE DID

You asked for upper school to have their own common room for lunch time.

We sorted a room for you and with your help have turned it into your space.

## INTERNET SAFETY

Our focus this half term is Peer To Peer (P2P) file sharing. Do you know what it is, how it works and what's being shared? Check out ClassDojo for a guide.
