# Axis IQ Plastic Card Printers

## About Axis IQ

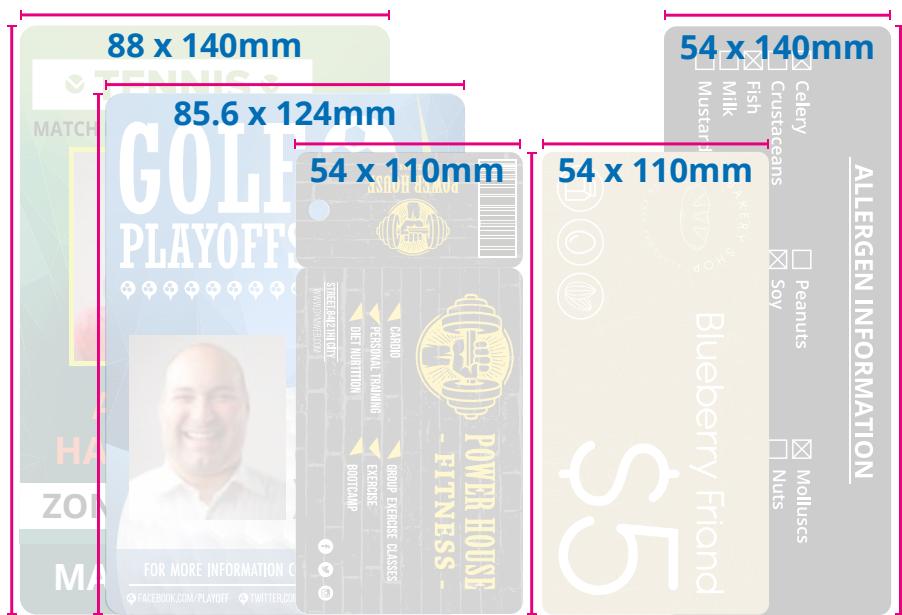

Located in Coffs Harbour and servicing clients from Sydney to the Gold Coast and out west to Inverell and Gunnedah, Axis IQ is made up of small team of highly experienced pros from a broad range of industries including print and design, marketing agency, mailhouse, digital media, private enterprise and the Registered Club Industry.

After 20 years operating as Axis Print Solutions, we changed our name in late 2016 to Axis IQ to really reflect what it is we do. We don't just print, or design, we provide solutions for our clients and those solutions are quite clever even if we do say so ourselves!

We understand how competitive the marketplace has become and businesses must constantly evolve and refine their offering to continue to appeal to and attract new customers. That's what we do best. We have the experience and the skills to get your business to cut through the noise and be seen and heard.

We love our clients and we always give 110 per cent to get them the results they deserve. Sound like the kind of organisation you'd like to have looking out for you?

# OVERSIZE CARD PRINTERS

Many organisations with environments requiring a large number of people in one place are moving to Oversized/large format ID cards. Oversized ID cards make the job of identifying who should or who should not be in a particular area easier to monitor and control.

Oversized credentials are frequently used for; tradeshows, events, concerts, music festivals, motor racing, golf, major sports and stadium special events, parking passes, hotel door hangers, tradeshows, media credentials, university, educational summits and seminars, and more.

There are only a handful of printers that can print to an Oversized card, and we can help identify the right one for your needs.

Our Oversized card printer brands and models include;

- Magicard E+ (Can also Print Standard ID cards)
- Zebra ZC10L
- Matica XL8300
- Swiftcolor SCC4000D (Fast 2s/Card)

Oversized Cards come in several different sizes and suit a wide variety of needs.

Some of the card sizes that you can print in-house include;

- 140 x 88mm (ZC10L/SCC4000D)
- 110 x 54mm Colour (Magicard E+)
- 140 x 54mm Mono (Magicard E+)
- 124 x 85.6mm\* (XL8300 )
- Various Custom Options (SCC4000D)

\* Prints 2 x CR80 Card Areas on a Large Card

# FOOD CARD LABEL PRINTERS

Driven by a need to ensure people know what they are eating new food labelling laws are taking effect across the world and plastic card printers are playing a significant part in meeting compliance needs.

Plastic cards are increasingly used for the labelling of foodstuffs in supermarkets, delicatessens and bakeries, replacing hand-written paper-based methods.

Axis IQ has a range of food-safe Card Printer consumables for use with your Magicard or Zebra Card Printers.

Magicard has one of the most versatile labelling options with the ability to print to extended length cards. Hygienic, clear to read and versatile, wipe-clean cards up to 140mm (5.5") long can be printed locally using Magicard desktop printers.

Magicard's dye film ribbon used to print pricing information or barcodes on the card's surface has been approved by ISEGA for food contact.

Zebra's Food Safe Card Solution ensures your business sends out

the right impression and adheres to food safety legislation.

The EU Food Information for Consumers Regulation No.1169/2011 now requires all food organisations serving unpackaged food or food packaged on site that is for immediate consumption to provide details of all items which contain the EU 14 major allergens.

In just a few quick and simple steps the Zebra Food Safe Card Solution can produce a branded plastic card complete with all the necessary information.

# SECURITY

There are many levels of security available to secure ID cards. Importantly choosing the right way to secure your ID cards can save you money without compromising your security.

Axis IQ can advise you on the best fit security for your needs and, contrary to popular belief, they don't need to increase your card production costs.

From a Watermark layer or UV Ink, through to advanced Laminated designs and electronic security, finding the right option for your budget and security demands are critical.

Our most popular security feature is the Holokote, a proprietary Magicard security feature available in both generic and custom designs that, once configured, does not incur any additional costs. (More information on HoloKote's can be found on page 8 of the catalogue.)

Another common form of ID card security is Variable UV Ink, which allows a variable image (e.g. Persons Name, or Photo) to be printed in a UV fluorescent layer under the clear coat of the printing. This is a covert form of security that can be used to detect fraudulent cards through the use of a UV torch.

When security becomes a critical factor in card issuance (e.g. Drivers License or National ID) more advanced levels of security are available. This includes Holographic overlaminates that can incorporate high resolution images and advanced designs that shift and change depending on angle of the card, or highly intricate static UV designs that can only be achieved in a top end facility.

For more information on your ID card security needs, talk to our experienced sales team who can help you navigate the complex field of ID card Security to help secure your ID cards, without blowing the budget.

# GALLAGHER/ CARDAX CARD PRINTER INTEGRATION

Axis IQ work closely with Gallagher and the major card printer manufacturers to ensure compatibility across a wide range of printers. The same model supplied by another distributor won't necessarily be compatible with Gallagher/Cardax. You will need to specify that you require a Gallagher integrated printer, including which software version, when you order.

Magicard 600

Matica XID 8300

## DEFINE YOUR SECURE IDENTIFICATION NEEDS

### FUNCTION

What will the card be used for:

- Visual identification?
- Machine-readable authentication?
- Physical and/or logical access control?

### ENVIRONMENT

What is the intended ID card lifespan?

What's the daily usage?  
Remember to factor in card wear and tear.

What volume of cards will you issue?

Centralized or on-demand production?

Are there plans for scalable growth?

### SECURITY

Is there a potential for card tampering, forgery or other threats?

How much does card re-issuance cost your organization?

Does your organization require sophisticated laminates, OVDs or other security print features?

Do you have existing databases for card personalization and data types?

Do you operate through secure web access?

Do you need a truly unique feature for overt security?

One- or two-sided printing?

Monochrome or full-color cards?

Define use of photos, text and graphics.

## REWRITABLE CARDS

### Models

Magicard Pronto 100

Magicard 300

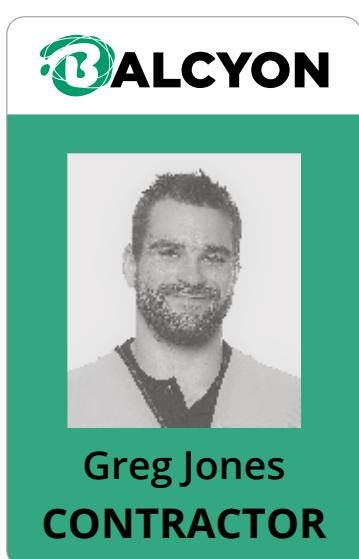

Zebra ZC300

Rewritable cards are plastic cards that are reusable or erasable. They have one glossy side in PVC for colour/monochrome dye sublimation printing and a matte finish rewritable side with a blue or black thermo chromic material that can be printed, erased and reused for up to 500 rewrite cycles. With the Magicard 300 you do not require a ribbon to print on the rewritable surface the cards. This is because they print information by heating a special thermo

sensitive material on the surface of a rewritable card. This technology allows you to batch print a colour design on one side of your cards, remove the ribbon and then use the rewrite feature and hand-feed slot to individually print, erase and update information in blue or black over and over on the other side. Rewritable ID cards are ideal for situations where a cardholder's information is updated frequently,

or for companies that process cards for each visitor in high volume and on a regular basis. Using rewritable technology significantly reduces the costs of conventional ID card issuance, which necessitates the use of brand new plastic cards and printer ribbons for each print. For organizations that are concerned about their carbon footprint, reusable cards are a great ecofriendly option.

Print

# CLUBS

Clubs of all sizes use plastic membership cards. While many cards utilise a photo ID, some clubs also print just a name and number on a pre-printed card.

Personalised membership cards are an important form of club branding and loyalty. With competition for walled real estate, being able to personalise your club membership card professionally, along with valuable member benefits, can ensure your card remains relevant and in your members wallet.

The right card printer for club membership cards will typically be determined by volume, peak card production volumes, and available desk space. However, there are often compromises, with smaller card printers look great on a desk but often cannot produce the volume to meet a larger clubs need reliably.

While larger card printers normally need to be stored on a desk behind reception, or in and admin office which can also cause some convenience issues.

Axis IQ provide card printers to suit a wide range of club membership card production needs, with most models in stock. Our team can recommend the right machine for the job and often ship the printers same day.

## PRE-PRINTED AND GIFTCARDS

Axis IQ provide a full range of custom pre-printed cards including prox cards, RFID (inc. MIFARE) and Magnetic stripe cards.

Our custom pre-printing can be base club membership card designs, through to advanced security based ID card stock for secure applications like drivers licenses. In recent years, one of the more popular applications for pre-printed cards is GIFT cards and Loyalty programs.

If you need some more information or pricing on our pre-printed card range contact our supplies team for a personalised quote.

## HOLOKOTE® ADDITIONAL SECURITY

### HoloKote

HoloKote technology is a secure watermark that is frosted onto the card surface during the normal print cycle using standard consumables (dye film and cards).

The HoloKote print process produces a watermark-like layer that can be visually verified when the card is tilted in the light. With all Magicard direct-to-card printers, the user can select from three standard secure HoloKote designs using the printer driver.

#### UltraSecure Key

Standard

#### Interlocking Rings

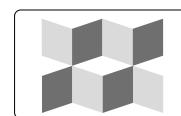

Standard

#### Globe

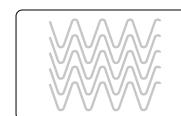

Standard

#### Cubes

Magicard 600

#### Waves

Pronto/300

### Custom HoloKote

For enhanced visual security, Custom HoloKote enables an organisation to implement their own personalised logo or other security design. Custom HoloKote is printed in a grid pattern across the card surface and is only available on the Magicard 600.

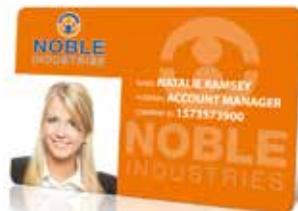

### Custom HoloKote Flex™

Custom HoloKote Flex offers the highest level of HoloKote security by enabling the customised watermark to be printed anywhere across the entire card surface. One standard design is included with the Magicard 600.

Standard HoloKote Flex Magicard 600 only

### HoloPatch®

HoloPatch card stock is enhanced with a highly reflective gold 'super diffuser' foil square that intensifies the visibility of any HoloKote logo.

Magicard concentrates on obtaining a technological edge in niche markets, with many of our products and technologies being market leaders in their field.

Magicard is one of the pioneers of ID card printing, having manufactured card printers since 1993 and provide differentiation by providing a quality product with enhanced card security features, and the best support and warranty in the business.

Magicard's patented HoloKote™ anti-counterfeiting visual security feature, 3 year Ultra Cover Plus (Magicard 600) warranty and renowned support sets Magicard apart in the ID card printer industry.

A trusted name for ID card printers Magicards' range of printers print full colour secure photo ID badges, membership cards, smart cards and access control badges.

## Magicard Warranty & Support

All Magicard printer solutions include a 3 year limited warranty that provides direct access to the global Magicard technical support team. A further one-year warranty is available at the time of purchase.

## Magicard UltraCoverPlus

UltraCoverPlus is a market-leading 3-year unlimited warranty package included with the Magicard 600 and includes;

- Direct technical support by phone or email from Magicard's experienced engineering team with technicians based across 5 continents.
- Free replacement of a damaged printhead no matter what the cause of failure
- Free loaner if a printer is shipped to our service centre for repair
- Personal guidance on printer use

# MATICA

Matica Technologies Group is a fast-growing and innovative global company with a strong international network. The company designs, develops and manufactures card-issuance systems, offering a vast range of products, from centralised systems and mailers to desktop ID card printers for Identification and Financial applications such as national ID, driving licenses, secure corporate ID cards, passports, access control cards, healthcare cards and transportation cards among others, covering all markets such as financial, government, healthcare, corporate, education, transport, telecommunication and retail.

Matica provides all personalisation technologies: color and monochrome direct-to-card and retransfer printing, high-quality laser engraving, embossing/indenting with tipping/infiller, ink-jet, lamination and integrates all encoding technologies such as magnetic stripe, contact and contactless cards and dual interface cards.

Matica solutions provide a huge number of security options such as colour photo ID with MSPI® (Matica Secure Protected Image), microtext, high-secure holographic overlaminates, laser-engraved personal data, printed or laser-engraved ghost image, tactile laser effect, changeable or multiple laser image (CLI/MLI), and MZR among others.

The Matica Technologies Group operates around the world through its offices in Switzerland (HQ), Italy, Spain, India, Malaysia, China the USA and the UAE, and supports its thousands of customers with its global network of Certified Resellers, Value Added Distributors and Integration Partners under the M-Connect Partner Program.

# ZEBRA

In more than 90 countries, Zebra card printers produce more than 1.5 million cards every business day. Card after card, Zebra printers deliver reliable performance and excellent print quality.

You can count on Zebra's ZXP printers to produce clear, sharp and colour-rich images when you need them, where you need them. Zebra printers are the most durable on the market, with great standard warranties. Easy to use and feature rich all Zebra card printers offer intuitive user interfaces and colour touch points, making them easy to use and reducing the amount of user training required. Choose from a broad range of printers offering full colour and monochrome card printing.

Options range from USB, wireless, or Ethernet connectivity, smart card, magnetic stripe and ultra high frequency (UHF) RFID encoding, to lamination for higher security and card durability. There is a Zebra card printer to meet all your business needs.

Most Zebra card printers print directly to plastic cards using dye sublimation and/or Thermal Transfer technology. These printing methods offer edge-to-edge, high-quality card printing for a wide variety of uses. Select from models that are ideal for high- or lower-volume printing, with multiple security and encoding options to meet your specific needs.

# ENTRUST

Entrust card printers are trusted by organisations worldwide to deliver secure, high quality ID cards with precision and consistency. Designed for businesses that demand reliability and advanced security, Entrust printers combine cutting edge technology with user friendly features to make card issuance simple and efficient.

From vibrant, full color images to crisp monochrome text, Entrust printers produce professional results every time. Built for durability and backed by strong warranties, these printers are engineered to handle the demand of high volume environments while maintaining exceptional print quality.

Connectivity options include USB, Ethernet, and wireless, along with advanced encoding for magnetic stripe, smart cards, and contactless technologies. For added protection and card longevity, lamination and security overlays are available across the range.

Entrust printers use industry leading dye sublimation and retransfer technology to deliver edge-to-edge high definition printing on a variety of card types. Whether you need a compact solution for on demand issuance or a robust system for large scale production, Entrust offers flexible models to meet your specific requirements.

# EVOLIS

Evolis printers deliver high quality card issuance with simplicity and speed, making them ideal for businesses, schools, and organisations that need reliable on demand printing. Known for their compact design and intuitive operation, these printers fit seamlessly into any workspace while producing vibrant edge to edge color cards and crisp monochrome designs.

With advanced direct to card technology, Evolis printers ensure sharp images and clear text for professional grade results. They are perfect for single-sided or dual-sided printing, offering flexibility for a wide range of applications from employee badges to membership cards.

Connectivity options include USB and Ethernet, with models supporting magnetic stripe, smart card and contactless encoding for secure credentials. Optional features such as lamination, UV printing and custom overlays add extra protection and durability. While rewrite technology allows for easy updates to temporary cards.

Evolis also emphasises sustainability, with energy efficient designs and recyclable ribbons that help reduce environmental impact.

# HID FARGO

For more than 50 years, HID has been a global leader in identity solutions, and Fargo printers are a cornerstone of that legacy. Known for innovation and reliability, Fargo systems are trusted by corporations, governments, and institutions worldwide to produce secure, professional grade ID cards.

Fargo printers combine advanced engineering with user friendly design, offering technologies like High Definition Printing (HDP) for over the edge photo quality results and Direct to Card (DTC) for fast efficient issuance. These solutions are built to scale from compact desktop models for small offices to robust systems for enterprise level production.

Security is at the heart of fargo printing. Optional features include lamination for durability, custom holographic overlays, UV printing, and microtext, along with encoding for magnetic stripe, smart cards, and contactless credentials. Combined with HID's trusted ecosystem, Fargo printers help organisations protect identities and prevent fraud.

With a reputation for durability, flexibility, and cutting edge security, HID Fargo remains the go to choice for businesses that demand more than just a printer.

# IDP

Found in South Korea in 2005, IDP has grown into a trusted name in card printing technology, delivering reliable and cost effective solutions to businesses worldwide. Known for combining smart design with affordability, IDP printers make secure card issuance simple and efficient.

Compact and easy to operate, these printers produce sharp, full colour cards and crisp monochrome designs using advanced direct to card technology. Their streamlined setup and intuitive interface reduce training time, making them ideal for organisations that value simplicity without sacrificing quality.

Security options include magnetic strip and smart card

encoding, with contactless technology available for access control. For added protection, IDP offers UV printing and lamination features to extend card life and deter counterfeiting.

Built for durability and low maintenance, IDP printers are a smart choice for schools, businesses and membership programs seeking dependable performance at an affordable price. With a strong heritage and a focus on practical innovation, IDP delivers confidence in every card.

# CARD EXCHANGE®

## Desktop ID card printing solutions

Any card personalisation software can help you create a basic card. CardExchange® Producer gives you all the tools you need to create the perfect card in a simple and fun way.

Within a few steps CardExchange® Producer makes it easy to create, connect, encode, and produce cards! With several optional preloaded card designs to choose from all waiting to make it your own.

With our Card Wizard you can create a card in just a few clicks. It's that simple! We also offer the use of one of our existing databases or you can connect to your existing database(s).

With drag and drop features you can easily add fields to your card layout without all the complicated manual mapping of fields other software programs require. And there you have it: a beautifully designed, fresh, high-quality card created in minutes.

## Advanced design tools

Create your own design from a blank canvas. CardExchange® Producer makes card layouts easy. Choose fonts and add images, graphics, barcodes, magnetic strip, and more.

Powerful graphic tools let you resize and rotate objects on your card, apply graphic enhancements, remove backgrounds from images and create variable images, all with a simple point and click.

You can even control the text: how it looks, merge fields, and even have an image background in the text field. Move everything around on the layout with the what you see is what you get feature until you see the card you envisioned.

## Endless opportunities

Create a unique experience for each user. With the powerful user profile feature, you can customise what each user can see and do when they log in.

For customising your card, you can even adapt CardExchange® with our scripting language feature. With the use of plug-in's we can adapt CardExchange® Producer to be exactly what you need.

From customised calculations to unique prompts, we have it all. You can connect to multiple databases specific for each card you create. All possibilities made just for you.

## Software Integrations

Cardexchange is integrated with many different platforms. A few of these include: HID, Salto, TASS, Bus Minder, Paper Cut, Roll Call & more!

Speak with our team to see if your platform is also integrated!

## SMART CARD READERS

Axis IQ provide a selection of smart card readers both installed within your card printer, or stand alone for use on PC's, Multi-Function Printers, Photocopiers and other systems.

Whether your need is to read or write detailed information to a smart card (contact or contactless) or to simply read a card serial number and enter it into your systems as if you were typing it, we have a card reader to meet your needs.

Our sales team can help with the best reader for your need and can provide recommendations for matching software solutions if required. Our resellers provide smart card readers to schools, retail point of sale, and membership applications across Australia.

## SIGNATURE PADS

Capturing signatures during card enrollment is essential for many industries, and one of the best ways to do this is with a signature pad. Axis IQ has a range of Signature Pads and Tablets to meet a wide range of signature capture needs.

Electronic Signature Pads allow you to store signatures digitally on various kind of documents, e.g. PDF, Word or any other form generated from a software application.

If you can't find the model you are after, please contact the sales team to see if we can make it available for you.

- Fast and smooth signing
- Document and Signature shown on the screen
- High-Quality capture techniques
- LCD interactive display

## BARCODE SCANNERS

Axis IQ offers a wide range of barcode scanners designed for fast and accurate data capture across various applications. Our scanners are available in handheld, cordless, and presentation styles to suit retail, warehouse, healthcare and office environments.

Whether you need to scan 1D or 2D barcodes, QR codes, or capture data from label and tags, we have a solution to meet your requirements. Our scanners deliver high performance, durability, and ease of use, ensuring smooth integration into your existing system.

Our sales team can assist you in selecting the right scanner for your workflow and provide recommendations for compatible software if needed. Our resellers supply barcode scanners for point of sale, inventory management, logistics and membership applications throughout Australia.

## RECEIPT & LABEL PRINTERS

WholesaleID provides a comprehensive range of receipt and label printers designed for reliable, high-quality printing in retail, hospitality, logistics, and office environments. Our printers deliver fast output, crisp text, and durable performance to keep your operations running smoothly.

Whether you need to print receipts at the point of sale or create custom labels for inventory, shipping, or product identification, we have solutions to meet your needs. Our printers support various media sizes and connectivity options, ensuring easy integration with your existing systems.

Our sales team can assist you in selecting the right printer for your application and provide recommendations for compatible software if required.

Available in:10/15/20/25mm

## ECO FRIENDLY CARDS & ACCESSORY OPTIONS

### Economical & Environmentally Friendly

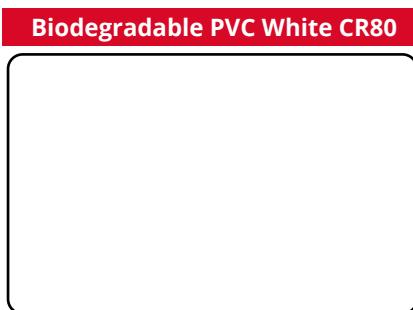

BIOCards are environmentally friendly cards are made from PVC resin which is treated so as to make them completely biodegradable. Under normal conditions, they perform exactly like our standard cards but when introduced into a fertile environment (e.g. compost, landfill, rubbish dump, the ground, lakes, rivers and the ocean) the breakdown process starts, completing in 1-5 years.

The material allows very high quality image reproduction with dye sublimation or thermal overprinting during the personalisation processes as it is PVC rather than an alternative product.

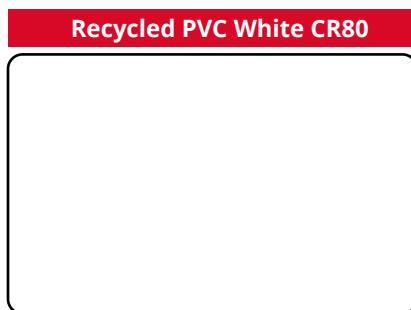

**“**  
*Plastics can take  
450-1000 years to  
decompose*  
**”**

**“**  
*90% of the trash  
floating in our  
oceans is made of  
plastic*  
**”**

# SMART CARDS/PROXIMITY CARDS/RFID

Developed with a smooth PVC surface with minimal chip deflection so every card looks great, EZEProx credentials have lower failure rates and higher system integrity than other proximity card alternatives. Available with both EZEProx and durable PET composite construction, EZEProx cards are built to last. These universally-compatible, durable cards combine photo ID with access control. Equivalent to other 1336, 1386, 1536, and 1586 prox cards, EZEProx proximity cards are the economical choice for any access control program.

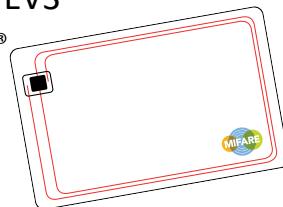

- 26-bit 125kHz prox (other bit formats available)
- ISO 7810 compliant
- CR80 30mil (Credit card size)
- PVC or PVC-PET construction
- Magnetic stripe card configurations
- Custom EZEProx 125khz option available. Other encoders available on request.

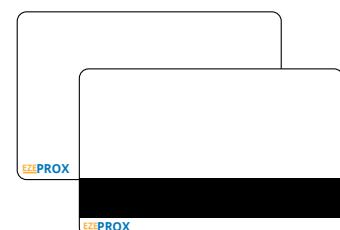

## EZEPROX

### EZEProx Cards

- MIFARE ULTRALIGHT®
- MIFARE DESFIRE EV3®
- MIFARE CLASSIC®
