

BE FOUND LOCALLY

Local Listings Management (LLM)

Be found on local directory searches on many of the most popular online directories including Google Maps, Apple Maps, Bing, Foursquare, and more!

How Does it work?

Instead of having to create and maintain dozens of different online profiles for each listing service or directory, we can do it for you in a few simple steps.

- 1.** We will verify your business information with major online directories.
- 2.** Your verified business information is then shared with many local online directories.
- 3.** Search engines and customers will be able to find your local business with accurate information.

Why is this important?

Digital Presence - with LLM and a comprehensive Google Business Profile, you will achieve a stellar digital presence on the web. The goal is to have your business information circulated online to be seen by potential customers.

Accuracy - If your business information is not consistent or accurate online, you could lose potential customers due to incorrect contact information.

Did you know?

64%*
