We originally made contact with Gray Projects when we were looking to rationalise the office space in our Sunshine Coast Headquarters.

They were able to assist us in achieving a more cohesive office environment that supported our new approach to our working environment.

Since then we have employed the services of Gray Projects on a number of projects within our regional office and sales offices. These works included minor maintenance, design, build and office fit out.

We have been extremely happy with the professionalism they have showed at all times throughout the course of their works, which was always completed within the given timeframes.

Some works were carried out while the offices were still occupied and they were able to attend to their tasks without disrupting our staff in their day to day duties. Gray Projects understood the complexities and sensitivity of working within our own work space, while we continued about our duties.

Gray Projects' Design and Project Management team proved to be both effective and efficient. This, coupled with a dedicated team of professional tradesmen and sub contractors has led to successful and pleasing results for us.

We would have no hesitation in employing Gray Projects in the future and wish them all the best.
