

NEW Credit Card on File Policy

To help control administrative costs, we are converting to a totally paperless billing system effective January 1, 2024. As of this date we will be asking every patient to keep a credit or debit card on file. Should you have a balance with us, we will send you an email notification. Within 5 days we will charge the account on file. You may call us within that time frame with any questions or concerns. Don't worry, your card information is kept on a secure merchant portal similar to Amazon or popular hotel chains. Enjoy the convenience of resolving your balance without receiving a paper statement and the hassle & cost of mailing a check.
