ORTHOPEDIC & SPINE

DR

Detector Options for MSK Practices

Right-Sized DR

The Right DR Detector for Your Ortho Practice

Long format, standard DR and CR to DR.

Every practice has a different exam mix, room and budget. **Pulse ISM compares DR detectors from multiple manufacturers** so you get the one that fits your practice.

FULL SPINE • LONG LEG • WEIGHT-BEARING • EXTREMITIES • SPORTS INJURIES

LONG FORMAT

Full spine and long leg imaging, sized for your practice. Single-exposure and multi-image options.

STANDARD DR

Upgrade your ortho room to DR without overbuying. Wireless and fixed detectors in the sizes you use.

CR TO DR

Keep the room and add a DR detector that works with your current X-ray system, when compatible.

NEW X-RAY ROOMS

If the room itself needs replacing, we compare complete DR X-ray rooms too.

Match the Detector to Your Exams

Spine & Scoliosis

- Full spine standing exams
- Scoliosis follow-up
- Long format or stitched images

Hips, Knees & Long Leg

- Long leg alignment
- Weight-bearing knee and hip
- Pre- and post-op imaging

Hands, Feet & Sports Injuries

- Smaller detector sizes
- Table and cross-table views
- Wireless for easier positioning

Not sure which detector fits? Tell us your exam mix, patient volume and current equipment. We'll compare options from multiple manufacturers and explain the trade-offs in plain terms.

Is Your Imaging Keeping Up With Clinic Days?

- **Still using CR** for long format or everyday exams
- **Stitching several images** for full spine and long leg
- **Sending patients out** for imaging you could do in-house
- **Aging detectors** or rising repair costs
- **Adding a provider** or opening a new location

You don't need to know which detector you want to start the conversation.

Why Pulse ISM

Multi-Manufacturer Sourcing
We compare DR detectors from several manufacturers around your room, volume and budget.

Musculoskeletal Imaging Focus
A woman-owned imaging partner with a focus on MSK imaging.

We Stay With You
We stay with you from the first call through installation, however long approvals take.

Supported After Installation
Installation, training and service coordinated through manufacturer-authorized partners.

Pulse ISM makes imaging equipment easier to buy, fund, and support, with the right-sized system for your room, your volume, and your budget.

MULTI-MANUFACTURER DR OPTIONS

How It Works

From Exam Mix to the Right Detector

We stay with you from the first call through installation, however long approvals take.

Bring Us Your Room and Exam Mix. We'll Help You Compare.

FOUR STEPS TO THE RIGHT DR DETECTOR

1 IDENTIFY

Your Exams

- Exam mix and volume
- Long format needs
- Current CR or DR
- Rooms and locations

2 COMPARE

Your Options

- Long format or standard
- Wireless or fixed
- Detector sizes
- Retrofit or new room

3 CONFIRM

The Fit

- Fit with your X-ray system
- Software and PACS connection
- Installation timeline
- Staff training

4 QUOTE

Your Project

- Itemized quote
- Product specification sheets
- Manufacturer warranty terms
- Service coordination

BEFORE YOU BUY

Every Practice Is Different. So Is the Right Detector.

We work through these with you, one question at a time.

LONG FORMAT OR STITCHING?

Compare single-exposure long format detectors with multi-image options for full spine and long leg exams.

WIRELESS OR FIXED?

Choose based on how your rooms are set up and how your techs position patients.

WHICH SIZES?

Match detector sizes to your exams, from hands and feet to chest and table work.

RETROFIT OR NEW ROOM?

Check whether a detector works with your current X-ray system before planning a full replacement.

START WITH A DR DETECTOR CONSULTATION

Tell us your exam mix. We'll recommend the right detector.
