Motivated, personable, professional with a successful technical track record. Desires a challenging position where my education and technical background will be utilized.

EXPERIENCE

PRODUCT STEWARD SPECIALIST/REGULATORY AFFAIRS SPEC

3M Transportation and Electronics Business Group St. Paul, MN Apr 2021 - Current

- Product stewardship activities for CBT product platforms (Vehicle Registration/Temporary Traffic Control/Reflective sheetings/Pavement Markings/Reflective Bead Manufacturing)
- Collaborate with corporate and CBT product platforms resources to manage complicated projects and decisions amongst cross-functional stakeholders in ever evolving complex regulatory environments to create alignment with CBT product platforms business objectives and corporate objectives.
- Assist 3M global customers with their product EHS&R inquiries including regulated lists, global inventories, local, state, federal and global regulations (ex. REACH/POPs/RoHS/WEEE/RMI/RBA/Legal Harvesting/COO/Prop 65/PFAS/IMDS/VOCs/Material Declarations)
- Product compliance for the CBT product platforms and North American manufacturing locations (ex. TSCA, OSHA, CEPA, EPA, HAPs, SDS, Product Labeling, DOT, CPSC)
- Lead CBT product platforms supported businesses with their Life Cycle Management needs and product risk assessments
- Perform core regulatory tasks for new and existing materials/products (Chemicals/Articles/& Hardgoods) to support internal managed substances lists, hardgood risk assessments, & human health/environmental reviews
- Provide support for new product introduction activities, including management of change activities and run requests
- Provide regulatory support for all environmental, sustainability, human health, safety (EHS) product platforms claims made by CBT via internal claims management process
- Create, manage, and maintain hazard communication documents for CBT product platforms
- Support ISO 9001:2015 quality management system via SOP & work instruction authoring
- Internal audit lead for CBT product platforms product stewardship business process systems. Tracks key corporate product steward business initiatives & metrics, conducts product platform gap analysis, & manages projects to close gaps identified.
