

Revitalise your energy at SIA Medical Centre Footscray

Introducing Iron Infusion Therapy

Feeling constantly tired, out of breath, or noticing your heart working harder than usual? Your body might be signaling an iron deficiency. At SIA Medical Centre Footscray, we understand how these symptoms can drastically impact your daily life. That's why we're excited to introduce our Iron Infusion Therapy, a quick and effective treatment

Why Choose Iron Infusion Therapy?

- **Fast and Efficient:** Iron infusion provides a quicker restoration of iron levels compared to oral supplements, with many patients experiencing improvements in as little as a few days.
- **Safe and Comfortable:** Performed under the supervision of our experienced medical professionals, ensuring a safe and comfortable experience.
- **Lasting Effects:** Enjoy long-term benefits and relief from symptoms of iron deficiency, including improved energy levels, cognitive function, and overall physical health.

Who Can Benefit?

Iron Infusion Therapy is ideal for individuals who:

- Have not responded to oral iron supplements.
- Experience significant side effects from oral iron.
- Have conditions that inhibit iron absorption.
- Require a rapid increase in iron levels due to deficiency or chronic conditions.

Costs

Iron infusion only with test results already supplied:

\$250.00 with a Medicare rebate of \$45.05.

Please purchase iron medication prior to procedure.

Iron infusion medication is at an additional cost purchased from your chosen pharmacy.

Please be advised bulk billing does not apply to Iron Infusion Therapy.

The Iron Infusion procedure is completed in approximately 1 hour, facilitated by both the doctor and nurse.

Please make sure to collect the iron from a chemist if you already have a script before coming to the appointment so you are ready to go at your booked in time.
