

Pharmacy Benefit Management

MC-Rx operates its own proprietary claims processing adjudication engine. All prescriptions are evaluated within the same integrated platform in real-time, whether filled by our own mail order/ specialty pharmacy or through our extensive retail pharmacy network. In just seconds, prescription claims process through 1,500+ edits, providing improved clinical outcomes and increased member satisfaction, while also delivering significant cost optimization to our clients.

MC-Rx's System Delivers:

- National pharmacy benefit management
- Flexible and scalable claims adjudication system
 - Real-time bank debit card processing for HSAS and pre-paid programs
- National pharmacy network with wrap options
- US-based 24/7 Customer Care Center
- Web-based pharmacy and member help desk application
- Customizable formulary
- Quality-focused clinical programs
- Medicare Part D services
- Drug utilization review and medication monitoring
- Interactive Member Portal
- Consumer-friendly mail order program
- Smart specialty pharmacy services
- Manufacturer rebate management system
- Comprehensive reports and business analytics

MC-Rx Delivers Comprehensive Part D Solutions

Our team of clinicians, managers, and software developers are here to assist with implementation, administration, and continuous compliance of your Part D programs. Our systems have been developed specifically for Managed Care and provide real-time claims processing according to complex Part D benefits, including proper True-Out-Of-Pocket (TrOOP) calculations and Coordination of Benefits (COB).

We will work in cooperation with any medical vendor to arrange for HIPAA-compliant, dual-direction data exchanges. Data coordination includes enrollment (with determination of effectuated members), accumulator transfers (financial information reporting), claims data, physician encounters, coverage determination information, Explanation of Benefits (EOBs), transition letters (if applicable), and other requisite digital files. Our end-to-end solution incorporates:

- Customized CMS-approved formulary management
- Benefit design consultation and development of clinical protocols
- Medicare plan finder integration
- Prescribing transaction processing
- Coverage determination management
- Accurate and timely Prescription Drug Events (PDE) management
- Real-time TrOOP tracking and data coordination/transfer
- RDS support
- Low Income Subsidy (LIS) management
- Easy-to-navigate Member Portal
- Member EOB generation
- Administrative PC-based eligibility software and support
- CMS-ready file formatting/reporting

Now Members
Can Receive the
Prescription Choices
They Want, at a
Price That You Need,
With the Reliability
and Accuracy You
Both Deserve.

MC-Rx Delivers Maximum Value

The huge advantage for MC-Rx clients is the ability to customize every aspect of benefit plan design, including copays, deductibles, DUR, eligibility, and pricing edits. Our powerful claims processing system is PC-based, which offers tremendous flexibility and scalability of plan design. Once received at the server, each claim is evaluated in a hierarchical order against multiple client-determined edits to verify eligibility requisites, including formulary compliance, duplicate claims, pricing discrepancies, incorrect/missing data, and both concurrent & retrospective Drug Utilization Review (DUR), just to name a few.

Unlike “cookie-cutter” providers, with ProCare Rx as your partner in prescription benefits management, your group has the ongoing adaptability and expertise to grow and change with your evolving business landscape.
