## Capability Statement

*Bino Construction provides prime and general construction services to Property Owners, Property Managers, HOA board members, and Local Government Agencies in the Los Angeles, Orange, and Ventura Counties. After 10 stellar years of service, we are known as a knowledgeable, quality-oriented service provider - helping our residential, commercial, and government clients solve some of the most difficult construction and trade problems. In addition to building structures, we provide high quality investigative, repair, and maintenance services. It's no surprise to our clients when we say... "yes, we can absolutely handle that for you," after having been asked if we can perform and administrate any specific trade task. Our motto is "contact us for any of your General Construction and All Trade Service needs." In unison with being diversified, we continue to build capabilities by maintaining valuable working relationships with highly capable specialty trade contractors and project managers. Our proven collaborative business approach enables priority client access to a cavalcade of specialized professionals. Many of these professionals have been working with us on our large Prime projects since we opened; building on our expanded capabilities and knowledge. We enable transparent complex project investment solutions to prevent delays, budget over runs, and any lack of quality that could occur whenever terms are pressed. We work closely with our clients to determine the best solutions to both unforeseen common and complex problems that can sometimes result in change orders. We consistently meet original and new deliverables and always work to find economies of scale when the job scope changes. To consistently achieve successful outcomes, we detail the entire job scope to include as much information possible for accurate budgeting, commissioning and project management. Presenting unrealistically low prices behind critical scope exclusions but before change orders; is not and never will be our sales path. Bino Construction consistently strategizes with clients on how to best schedule, coordinate, and complete small and large projects better, faster, and under budget. Being able to provide valuable construction solutions for our clients is the cornerstone of our future. It is therefore our forever mission to provide valuable, high-quality, customer-oriented, resolution-based services to each of our clients as we continue to grow.*

### CORE COMPETENCIES

- General Contracting
