## To Your Health

People in the U.S. are living longer than ever before. Many seniors live active and healthy lives. But there's no getting around one thing: as we age, our bodies and minds change. There are things you can do to stay healthy and active as you age. Eating a balanced diet, keeping mind and body active, not smoking, getting regular checkups, and practicing safety habits at home and in the car will help you make the most of life.

**PREVENT FIRES CAUSED BY HEATING:**

**SPACE HEATERS**

*Space heaters need space. Keep them at least three feet away from things that can burn, such as curtains or stacks of newspaper. Always turn off heaters when leaving the room or going to bed.*

**FURNACES**

*Have a service person inspect chimneys, fireplaces, wood and coal stoves and central furnaces once a year. Have them cleaned when necessary.*

**FIREPLACES AND WOOD STOVES**

*Keep things that can burn away from your fireplace and keep a glass or metal screen in front of your fireplace.*

**For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)**

**CONSERVING ENERGY  
in your KITCHEN**

- If you're making a picnic, choose plastic over paper plates. They can be reused and recycled.
- Put a lid on your pot or pan in order to bring the contents up to temperature more rapidly, leading to shorter cooking times.
- Buy energy saving appliances to help global warming. Visit [www.energy.star.gov](http://www.energy.star.gov) for more information.
- Use reusable containers to put away leftovers rather than plastic wrap or foil.
- Use rags to clean up messes when possible to conserve on paper towels.

**KEEP YOUR FAMILY SAFE AT HOME:**

*Make a fire escape plan for your family. Find two exits out of every room. Pick a meeting place outside. Practice makes perfect – hold a family fire drill at least twice each year.*

*Install smoke alarms on every level of your home. Put them inside or near every bedroom. Test them monthly to make sure they work. Put in new batteries once a year.*

*Teach every family member to "Stop, Drop, Roll and Cool" if clothes catch fire by dropping immediately to the ground, crossing hands over your chest and rolling over and over or back and forth to put out the flames. Cool the burned area with cool water and seek medical attention for serious burns.*

*Learn how and when to use a fire extinguisher.*

*For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)*

*To Your Health*

People in the U.S. are living longer than ever before. Many seniors live active and healthy lives. But there's no getting around one thing: as we age, our bodies and minds change. There are things you can do to stay healthy and active as you age. Eating a balanced diet, keeping mind and body active, not smoking, getting regular checkups, and practicing safety habits at home and in the car will help you make the most of life.

**KEEP YOUR BABY SAFE FROM FALLS**

Use safety gates at the tops and bottoms of stairs. For the top of stairs, gates that screw to the wall are more secure than "pressure gates."

Always use safety straps on high chairs, changing tables and strollers.

Wipe up spills when they happen.

Have window guards or window stops on upper windows. But make sure you can open the window fast in case of a fire.

Cover the ground under playground equipment with a thick layer (9-12 inches) of mulch, wood chips or other safety material.

For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)

## SWIMMING SAFETY:

*If you have a pool or spa, install a fence that goes all the way around it. The fence should close and latch by itself. It should be least five feet high.*

*Always keep gates closed and latched. Never prop a gate open.*

*When children are in or near the water, a grownup should watch them very carefully. Do not take your eyes off them.*

*Enroll non-swimmers in swimming lessons taught by a qualified instructor.*

*Never swim alone. Even adults should swim with a buddy.*

*Learn how you would save someone in trouble. Learn First Aid and CPR. Make sure that anyone who cares for your children learns CPR.*

*Keep poolside rescue equipment and a cordless, water resistant telephone close to the pool area.*

*Keep spas and hot tubs covered and locked when not in use.*

*For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)*

*To Your Health*

People in the U.S. are living longer than ever before. Many seniors live active and healthy lives. But there's no getting around one thing: as we age, our bodies and minds change. There are things you can do to stay healthy and active as you age. Eating a balanced diet, keeping mind and body active, not smoking, getting regular checkups, and practicing safety habits at home and in the car will help you make the most of life.

**NIH: National Institute on Aging**

**PREVENT YOUR CHILD FROM CHOKING & SUFFOCATING:**

*Read the labels of all toys before you let your child play with them. Make sure your child is old enough to use that toy. The label will tell you the safe age.*

*Cut your toddler's food into very small bites.*

*Always make sure children eat while sitting down. Do not let them have round food like peanuts or hard candy.*

*Window blind cords should not have a loop. Cut any loop in two pieces.*

*Place blind cords up high where children cannot get them.*

**KEEP YOUR FAMILY SAFE AT HOME:**

*Make a fire escape plan for your family. Find two exits out of every room. Pick a meeting place outside. Practice makes perfect – hold a family fire drill at least twice each year.*

*Install smoke alarms on every level of your home. Put them inside or near every bedroom. Test them monthly to make sure they work. Put in new batteries once a year.*

*Teach every family member to "Stop, Drop, Roll and Cool" if clothes catch fire by dropping immediately to the ground, crossing hands over your chest and rolling over and over or back and forth to put out the flames. Cool the burned area with cool water and seek medical attention for serious burns.*

*Learn how and when to use a fire extinguisher.*

The Phone Directory is the final link between seller & buyer. Your ad provides the who, what, where & why when customers are ready to buy. It's good business to advertise in the Phone Directory. PDS Phone Directory is easy to use and constantly available. Where else can you put your advertising message in front of shoppers 24 hours a day, 365 days a year?

**When Wise People are Ready to Buy, They Regularly Refer to the Phone Directory**

**KEEP YOUR BABY SAFE FROM POISONS:**

Know the things in your home that are poisons.

Look at the labels for the words "Caution," "Warning," "Danger," "Poison," or "Keep Out of Reach of Children" on the box or bottle. Remove all medicines and medical supplies from purses, pockets and drawers. Keep them locked up.

Put cleaners, medicines, alcohol and other poisons in a cabinet with a child safety lock or latch. Have child safety caps on all chemicals, medications and cleaning products.

Know to call **1-800-222-1222** if someone takes poison. This number will connect you to emergency help in your area. Keep the number by every phone.

Call **911** if someone is seizing.

Put a carbon monoxide (CO) alarm near the bedrooms in your home. A CO alarm will tell you if the gas level is too high.

For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)

**PREVENT FIRES CAUSED BY COOKING:**

*Always stay in the kitchen while cooking.*

*Keep things that can burn, such as dishtowels, paper or plastic bags, and curtains at least three feet away from the range top.*

*Roll up sleeves and use oven mitts. Loose-fitting clothes can touch a hot burner and catch on fire.*

*Always stay by the grill when cooking. Your grill may stay hot for a long time. Keep children and pets away.*

*Keep grills at least ten feet away from other objects, including the house and any shrubs or bushes.*

*For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)*

**KEEP YOUR BABY SAFE FROM FALLS:**

Use safety gates at the tops and bottoms of stairs. For the top of stairs, gates that screw to the wall are more secure than "pressure gates."

Always use safety straps on high chairs, changing tables and strollers.

Wipe up spills when they happen.

Have window guards or window stops on upper windows. But make sure you can open the window fast in case of a fire.

Cover the ground under playground equipment with a thick layer (9-12 inches) of mulch, wood chips or other safety material.

For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)

Can't find a heading?

*Look in our Heading Index at the beginning of the yellow pages!*

**PREVENT YOUR CHILD FROM CHOKING & SUFFOCATING:**

*Things that can fit through a toilet paper tube can cause a young child to choke. Keep coins, latex balloons and hard round foods, such as peanuts and hard candy where children cannot see or touch them.*

*Place babies to sleep on their backs, alone in their crib. Don't put pillows, blankets, comforters or toys in cribs. These things can sometimes keep a baby from breathing.*

*When your children are in or near water, watch them very carefully. Stay close enough to reach out and touch them. This includes bathtubs, toilets, pools and spas – even buckets of water.*

**SWIMMING SAFETY:**

*If you have a pool or spa, install a fence that goes all the way around it. The fence should close and latch by itself. It should be least five feet high.*

*Always keep gates closed and latched. Never prop a gate open.*

*When children are in or near the water, a grownup should watch them very carefully. Do not take your eyes off them.*

*Enroll non-swimmers in swimming lessons taught by a qualified instructor.*

*Never swim alone. Even adults should swim with a buddy.*

*Learn how you would save someone in trouble. Learn First Aid and CPR. Make sure that anyone who cares for your children learns CPR.*

*Keep poolside rescue equipment and a cordless, water resistant telephone close to the pool area.*

*Keep spas and hot tubs covered and locked when not in use.*

**For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)**

M

**KEEP YOUR FAMILY SAFE AT HOME:**

*Make a fire escape plan for your family. Find two exits out of every room. Pick a meeting place outside. Practice makes perfect – hold a family fire drill at least twice each year.*

*Install smoke alarms on every level of your home. Put them inside or near every bedroom. Test them monthly to make sure they work. Put in new batteries once a year.*

*Teach every family member to “Stop, Drop, Roll and Cool” if clothes catch fire by dropping immediately to the ground, crossing hands over your chest and rolling over and over or back and forth to put out the flames. Cool the burned area with cool water and seek medical attention for serious burns.*

*Learn how and when to use a fire extinguisher.*

## KEEP YOUR BABY SAFE FROM POISONS:

*Know the things in your home that are poisons.*

*Look at the labels for the words "Caution," "Warning," "Danger," "Poison," or "Keep Out of Reach of Children" on the box or bottle. Remove all medicines and medical supplies from purses, pockets and drawers. Keep them locked up.*

*Put cleaners, medicines, alcohol and other poisons in a cabinet with a child safety lock or latch. Have child safety caps on all chemicals, medications and cleaning products.*

*Know to call **1-800-222-1222** if someone takes poison. This number will connect you to emergency help in your area. Keep the number by every phone.*

*Call **911** if someone is seizing.*

*Put a carbon monoxide (CO) alarm near the bedrooms in your home. A CO alarm will tell you if the gas level is too high.*

**For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)**

### PREVENT YOUR CHILD FROM CHOKING & SUFFOCATING:

*Read the labels of all toys before you let your child play with them. Make sure your child is old enough to use that toy. The label will tell you the safe age.*

*Cut your toddler's food into very small bites.*

*Always make sure children eat while sitting down. Do not let them have round food like peanuts or hard candy.*

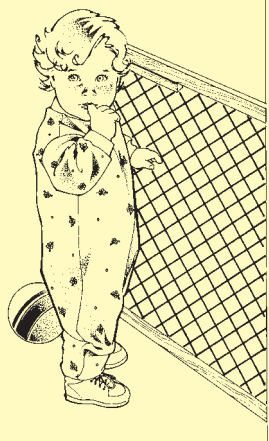

*Window blind cords should not have a loop. Cut any loop in two pieces.*

*Place blind cords up high where children cannot get them.*

**For more safety tips visit**  
[www.homesafetycouncil.org](http://www.homesafetycouncil.org)

## SWIMMING SAFETY:

*If you have a pool or spa, install a fence that goes all the way around it. The fence should close and latch by itself. It should be least five feet high.*

*Always keep gates closed and latched. Never prop a gate open.*

*When children are in or near the water, a grownup should watch them very carefully. Do not take your eyes off them.*

*Enroll non-swimmers in swimming lessons taught by a qualified instructor.*

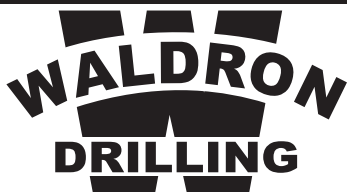

*Never swim alone. Even adults should swim with a buddy.*

*Learn how you would save someone in trouble. Learn First Aid and CPR. Make sure that anyone who cares for your children learns CPR.*

*Keep poolside rescue equipment and a cordless, water resistant telephone close to the pool area.*

*Keep spas and hot tubs covered and locked when not in use.*

*For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)*

**How to get help for childhood poisonings**

**CALL POISON CONTROL**  
and make sure to have this information available:

1. **NAME OF THE PRODUCT** or medicine that you suspect that your child was exposed to
2. **HOW THEY WERE EXPOSED** (did they swallow it, inhale it or just get it on their skin, etc.)
3. **HOW MUCH** were they exposed to
4. **CURRENT SYMPTOMS** they are having

You will likely also be asked for your child's age and weight, whether or not they have any medical problems, and a call back number, so have this information handy as well.

**The most dangerous poisons include:**  
medications and vitamins • household products  
carbon monoxide • windshield washer fluid

**Poison Control Nationwide**

## SWIMMING SAFETY:

*If you have a pool or spa, install a fence that goes all the way around it. The fence should close and latch by itself. It should be least five feet high.*

*Always keep gates closed and latched. Never prop a gate open.*

*When children are in or near the water, a grownup should watch them very carefully. Do not take your eyes off them.*

*Enroll non-swimmers in swimming lessons taught by a qualified instructor.*

*Never swim alone. Even adults should swim with a buddy.*

*Learn how you would save someone in trouble. Learn First Aid and CPR. Make sure that anyone who cares for your children learns CPR.*

*Keep poolside rescue equipment and a cordless, water resistant telephone close to the pool area.*

*Keep spas and hot tubs covered and locked when not in use.*

**For more safety tips visit [www.homesafetycouncil.org](http://www.homesafetycouncil.org)**

**KEEP YOUR  
BABY SAFE  
FROM POISONS:**

*Know the things in your home that are poisons.*

*Look at the labels for the words "Caution," "Warning," "Danger," "Poison," or "Keep Out of Reach of Children" on the box or bottle. Remove all medicines and medical supplies from purses, pockets and drawers. Keep them locked up.*

*Put cleaners, medicines, alcohol and other poisons in a cabinet with a child safety lock or latch. Have child safety caps on all chemicals, medications and cleaning products.*

*Know to call  
**1-800-222-1222**  
if someone takes poison. This number will connect you to emergency help in your area. Keep the number by every phone.*

*Call **911** if someone is seizing.*

*Put a carbon monoxide (CO) alarm near the bedrooms in your home. A CO alarm will tell you if the gas level is too high.*

*For more safety tips visit

**CONSERVING ENERGY while CLEANING**

- Instead of adding yard water or lawn clippings to landfills, use a mulching mower.
- Use healthier cleaning products. Good cleaning does not have a smell and is safer for you.
- Clean or replace air filters on your air conditioning unit at least once a month.
