

cvi42[®] | Plaque

Why Choose cvi42 | Plaque?

Fast. Reproducible. Integrated.

cvi42 | Plaque empowers cardiac imaging teams with AI-enabled, on-premise coronary plaque analysis. It delivers precise measurements of plaque **volume, burden, composition, and distribution**, all **fully integrated** into your CT imaging workflow.

- **AI-enabled automation**
- **No outsourced processing**
- **Full user control**
- **Efficient workflow**

Operational Benefits that Just Make Sense

With cvi42 | Plaque, you are in complete control of your coronary CTA workflow—from post-processing to reporting to billing. There's no waiting for results, no sending data to an outside reading service, and no giving up the majority of the reimbursement.

- **Favorable reimbursement for AI-enabled Coronary Plaque Analysis**
 - NEW Category I CPT code, 75577, effective January 2026.
 - Reimbursement set at ~\$1,000, alongside base payments for the underlying CCTA exam.
- **Affordable pricing model that keeps the reimbursement in your hands!**
 - cvi42 | Plaque is available with a volume-based subscription model. You only pay for the studies that you process for plaque analysis.
 - Flexible licensing model provides unlimited user seats from any location.
 - You retain more than half of the reimbursement for each study you perform.

With a streamlined clinical workflow that helps you read more cases, and a pricing model that keeps more of the reimbursement in your hands, we help you **grow your cardiac imaging business!**

Ready to enhance cardiovascular care with precision plaque analysis?
