To Our Valued Customers:

We are finding there is an excessive amount of contamination in the recyclables of non-recyclable items. Recycling is NOT anything that can be reused or repurposed. View our website for the HRRRA Recycle Brochure for your reference. Below are items that cannot go into the recycling cart or container.

- No food waste can go in the recycling, including food residue in pizza boxes, glass jars, aluminum jars and takeout containers
- No shredded paper, Styrofoam, gift wrappings, take-out containers
- No clothing
- No combustibles, including propane tanks, non-food grade aerosol cans
- No batteries or car batteries
- No electronics
- No paint cans
- No wood, demolition or metal
- No yard debris or earth materials

The following items can go in the recycle cart or containers when there is no food remanence. These items must be emptied, cleaned, and/or rinsed out.

- Pizza boxes
- Paper food and beverage cartons
- Newspapers, magazines, junk mail, office papers
- Cardboard boxes
- Glass bottles and jars
- Metal food and beverage cans, lids included
- Aluminum foil and foil containers
- Plastic bottles, jugs and tubs, lids included.

Our company gets fined when the recycling is contaminated. There may be a charge for recycling that is contaminated with items that are not recyclable. Recycling properly ensures that we can remove the recycling efficiently and it can get disposed of properly which is better for the environment. If you have any questions about a specific item, visit WWW.HRRRA.ORG and type the item in the search bar.

Thank you for we appreciate your cooperation!
