

Liz Nicklus

Statement

My passion is constantly searching for new media and experimenting with new ways to use them. I'm always happily surprised at the amount of people who identify with my work, since I don't dictate their experience, allowing them to create their own.

Much of my art contains 3 dimensional objects. I have found that this allows everyone to be able to enjoy different aspects of my pieces. In this exhibit my work will be exposed to an extended audience, many of whom will be able to experience it on a non-traditional level.
