

Concentrate
your
efforts

Echo® offers you broad spectrum disease protection with the contact fungicide chlorothalonil. Echo's concentrated formulations mean less handling for more acres. And Echo comes with DuraShield™ technology for long-lasting rainfast protection.

Echo delivers

- **Broad spectrum disease control**
- **Multi-site modes of action**
- **The highest available concentration of chlorothalonil in both liquid and granular formulations**
- **Research-tested* DuraShield rainfast technology to keep Echo on the plant**
- **35% to 40% more acres** than the competitive brand**

Echo®
FUNGICIDE

Durashield™
Excellent Rainfastness

* Research conducted by Department of Plant Agriculture, University of Guelph, 2011.

** One unit of liquid compared. One unit of dry provides 70 to 80% more acres.

- Anthracnose
- Botrytis
- Alternaria
- Septoria leaf spot
- Fruit rots
- Downy mildew
- Grey mould

Plus many others. For a complete list of diseases, visit www.uap.ca

Three Concentrated Formulations

Echo 90 WSP

Echo's dry flowable formulation in water soluble pouch contains 80% higher concentration of chlorothalonil than the competitive brand. Available in 20 x 500g.

Concentration Comparison

9 (10L) jugs = 5 (20 x 500g)

Watch an Echo 90 demo video to see how easily Echo dissolves into solution.

Echo 720

Echo NP

Echo's liquid formulation contains 35% higher concentration of chlorothalonil than the competitive brand. Available in 2 x 9.46L (Echo NP) jugs or 450L tote (Echo 720).
