# OUR STORY

Fourth Generation farmers Dan & Jill Bingham founded the journey of success over 35 years ago with the long-term business strategy of being a large-scale contracting business that is **reliable and professional**. The initial purchase of a Chamberlain super 90 tractor and combine was a means of providing additional income outside the farm gate which funded the first header purchase. We now provide sowing, tillage and harvesting services to some of Eastern Australia's largest and most progressive farming operations.

To expand the family business Dan & Jill have built **long-term business relationships** and **employ on culture** rather than direct skill sets. The business currently employs greater than 30 full time staff with other full-time prospects entering the workforce prior to the harvest period. "Our diverse skill set is second to none and our wealth of knowledge shows in our quality of work".

Adjoining the contract services the Bingham family also owns and operates a mixed farming enterprise of approximately 10,000 acres situated within the western districts of Victoria. Dan has been a leading adopter of broad acre cropping within the historically merino sheep producing district with the vision of bringing practices from the north to the south resulting is **increased efficiencies and more sustainable farming practices**.

Bingham Agriculture is driven by some of Australia's most ambitious young people within the agricultural sector. A passion for agricultural excellence leads the business and we aim to provide a friendly, professional, educational and inclusive workplace.

# OUR MISSION

Our mission at Bingham Agriculture is to be a professional, large scale service provider to farming operations in Eastern Australia. Using the latest technology and modern machinery to drive efficiency and profit for our long-term business partners now and into the future, **giving farmers more time to farm.** To be an employer of choice providing a challenging, enjoyable and educational workplace.

# HARVESTING

Australia's largest fleet of modern John Deere headers servicing the eastern states of Australia. Our economy of scale ensures we are accountable and adaptable to our customer requirements.

Our machines are operated by some of the most passionate and ambitious operators within the agricultural industry enabling us to provide a service of unbeatable quality and experience. We pride ourselves on delivering to what we've commit to.

- **Diverse range of modern machines equipped with GPS autosteer.**
- **Front sizes ranging between 60ft, 50ft, 45ft and 40ft.**
- **John Deere 615P pick up fronts.**

# SOWING

Fleet of six 60ft Seed Hawk air seeders equipped with additional features and modifications to ensure our clients start their year one step ahead of the rest.

# TILLAGE
