Level 2 Behavior Support Services for Adult Providers

Overview

We provide Level 2 Behavior Support Services for adult service providers operating under Georgia's developmental disabilities system. Services are delivered in accordance with DBHDD expectations and are planned, scheduled, and consultative, with an emphasis on proactive behavior support, staff consistency, and regulatory alignment. Our role is to support provider agencies through assessment, behavior support plan development, monitoring, and staff training, *not crisis response or emergency coverage*.

Eligible Provider Settings

- Adult Day Services / Community Access programs
- Supported Employment and Pre-Vocational programs
- Community-based adult IDD services
- Providers operating under **COMP and NOW Waivers**

Services are appropriate for both single-site programs and multi-site provider organizations.

Level 2 Scope of Services

Consistent with DBHDD Level 2 expectations, services may include:

- Functional Behavior Assessments (FBAs) for adults
- Development of individualized Behavior Support Plans (BSPs)
- Ongoing BSP monitoring and data review
- Behavior plan revisions and updates
- Staff training related to BSP implementation
- Environmental and routine-based behavior supports
- Consultation addressing transitions, task engagement, self-regulation, and social behavior
- Documentation support related to BSP compliance and monitoring

All services are scheduled and goal-driven and integrated into existing program routines.

Service Delivery Model

Services are delivered using a **hybrid model**:

- **Telehealth** for consultation, data review, staff coaching, meetings, and plan updates
- **Periodic in-person visits** for initial assessments, observation, and fidelity checks

This model supports consistency while minimizing disruption to program operations.

Service Boundaries

Level 2 behavior support services provided through our practice:

- Do **not** include crisis response or emergency intervention
- Do **not** include on-call or after-hours availability
- Do **not** provide 24/7 coverage or intensive stabilization services
- Do **not** involve direct care staffing or paraprofessional supervision

When higher-acuity or crisis services are required, provider leadership is supported in identifying appropriate resources.

Contracting & Availability

Services are provided through consulting agreements and are available on a limited, scheduled basis. This model allows providers to access Level 2 behavior analytic expertise without adding full-time clinical staff.
