DIMENSIONS

Please note: Matrix gas log fires fascias are available as either wall mounted or floor mounted. See above drawings for fascia sizes. The flue system must be installed by an Authorised installer.

Some installations may require the provision of a hearth to protect the floor from radiant heat. Contact your Illusion dealer for more information.

Matrix

SMALL GAS LOG FIRE

Introducing the Matrix Small Gas Log Fire by Illusion, Australias foremost manufacturer of Gas Log Fires.

The Matrix Small features economy, performance and style and it's compact dimensions makes it the perfect choice to keep smaller areas warm and comfortable in your home without breaking the budget.

Capable of heating up to 100 sq metres, the stunning Illusion Matrix Inbuilt Gas Log Fires are available in a range of colours including Metallic Black with several trim options designed to suit any decor.

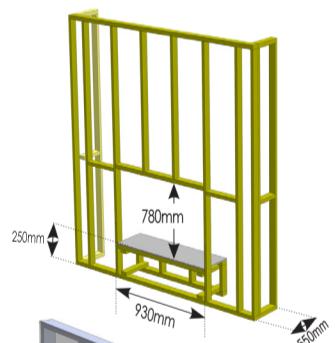

Australia's Leading Gas Log Fire Manufacturer

FRAME CUTOUT

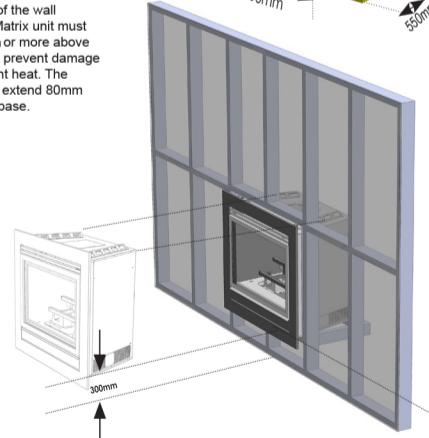

MATRIX SMALL Frame and plaster cutout dimensions.
NOTE: Minimum frame depth 600mm.
Example Wall mount shown below.

The frame and plaster cutout dimensions as shown above should be cut as accurately as possible to ensure adequate coverage by the appliance fascia. Illusion can supply fabricated full metal frames to simplify the installation and reduce costs.

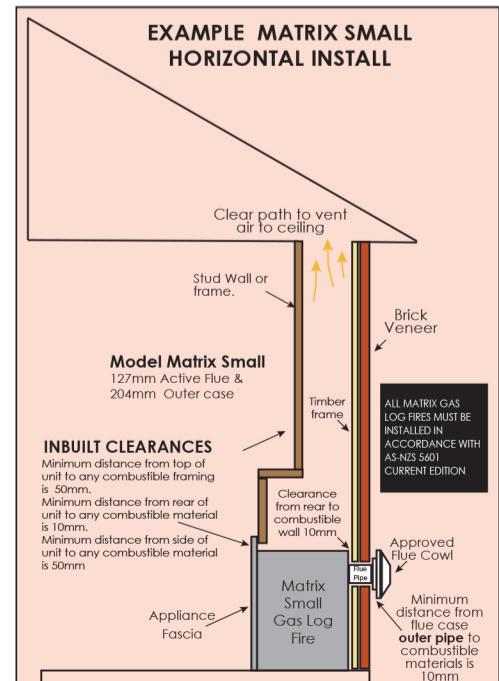

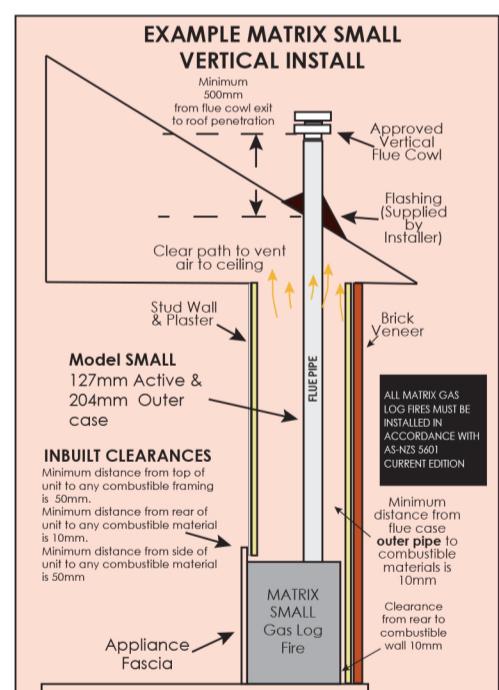

The cutout dimensions (Shown at right) are the same for both the Wall mounted or floor mounted versions of the Matrix Gas Log Fire.

The base of the wall mounted Matrix unit must be 250mm or more above the floor to prevent damage from radiant heat. The Fascia will extend 80mm below the base.

INSTALLATION

A hearth is required for the floor mounted version. The hearth must extend 150mm past either side of the fascia sides and must be constructed of non combustible materials.
