

2025 PRODUCT BROCHURE

kalora

HEART OF THE HOME

Our mission at Kalora is to bring heating back to the realms of affordability with a high quality product that is designed to fit as comfortably in the contemporary stylings of a modern environment as it is in a traditional country homestead.

The team at Kalora have extensive experience designing, manufacturing and supplying quality heating appliances to Australian's for over 70 years. The Kalora range is the result of a collaborative effort to produce one of the most efficient, environmentally friendly heating ranges ever to be sold in the Australian market.

Designed and manufactured in our state of the art, world class facility, each Kalora appliance is constructed and finished in the highest quality materials available. We combine high tech industrial design, robotic technology and quality materials to ensure years of "hassle free heating" with the backing of a 15 year firebox warranty on selected Kalora appliances.

designed AND BUILT TO LAST

- ✓ Kalora's range of radiant and fan forced convection wood fires are engineered to efficiently heat homes up to 300m².
- ✓ All Kalora wood fired appliances meet or exceed the 2019 Australian Standards for emissions and efficiency.
- ✓ Premium quality Senotherm high temperature paint is the standard finish on all Kalora appliances.
- ✓ Kalora wood fired appliances are designed to maximise burn times and fulfill our obligations to reduce emissions under the Australian Standard.
- ✓ Don't have a chimney?
Not a problem, zero clearance solutions are available for all Kalora inbuilt wood & gas fired appliances.
- ✓ Kalora appliances include high quality, low maintenance fireproof glass that is made in Japan.
- ✓ Our "clearview" air wash system keeps the fireproof glass clear and cleaner, for longer.

striving towards

A SUSTAINABLE FUTURE

**KALORA IS COMMITTED TO ENVIRONMENT
SUSTAINABILITY AND PROMOTES THE USE
OF RENEWABLE ENERGY.**

We support good forestry practices and ongoing improvements in wood burning stoves and heaters that use firewood. Firewood serves an important role in Australia's domestic heating sector and is an affordable heating option for many families.

As a renewable fuel source, sustainably sourced firewood does not add to net greenhouse gas production; in fact international pressure to reduce greenhouse gas emissions are highlighting wood fired appliances as a key contributor to achieving emission targets.

When sustainably managed, firewood recycles carbon from the atmosphere. Firewood plantations can also serve other ecologically desirable functions including wastewater treatment, salination reduction, erosion control, wildlife habitat and aesthetics.

Using firewood to heat your home is the most sustainable form of heating and far more efficient and environmentally friendly alternative to electric heating which relies on base load power generated by coal fueled power stations.

welcome

TO OUR 2025 RANGE

**IN 2025 KALORA IS CONTINUING TO BRING YOU
AFFORDABLE QUALITY; STRIKING THE PERFECT
BALANCE BETWEEN COST AND VALUE.**

Whether it's a traditional upright freestanding wood heater, or a modern contemporary design, our wood heaters come in a range of styles to compliment any decor. The Kalora range offers great value for home-owners while still delivering exceptional performance and craftsmanship.

Our wood heaters have a unique charm that truly does make them the heart of any home. Their warm, crackling flames evoke a sense of nostalgia and comfort, creating a cozy ambiance that no other heating solution can match.

Urban LS depicted as inbuilt

Urban Inbuilt

Accent

Accent

The Kalora Accent inbuilt wood heater has been specifically designed for installation into existing masonry fireplaces overcoming the inefficiencies associated with traditional open fires such as excessive fuel burn, uncontrollable heat levels and energy that is lost straight out of the chimney.

The Accent also accommodates for those who love the look of an inbuilt wood heater but do not have an existing open fireplace. Our zero clearance solutions avail the opportunity to install the Kalora Accent into a timber-framed wall with the need for only minimal clearances.

THE BENEFITS

- 1

PERFECT FOR THE PRE-EXISTING
Designed to fit into existing masonry fireplaces to overcome inefficiencies giving you more control.
- 2

ZERO CLEARANCE OPTION
Allows you to install the Accent into a timber-framed wall with minimal clearances.
- 3

MINIMALIST DESIGN
Clean lines and minimalist features, paired with gentle touch controls, allow the flame to be the focal point of the room.

TECHNICAL SPECIFICATIONS

 Heat up to 280m ²	 Firebox: 600w x 480d x 354h	 Efficiency 61%

PLEASE NOTE

It is COMPULSORY to have your heater installed by a qualified person whose work conforms to Australian standards, local council regulations and manufacturer's recommendations. Your warranty and any home insurance may be void, on failure to do so.

Please refer to your units online user manual for the most up to date clearance information & hearth requirements.

KaloraHeating

PROFESSIONAL INSTALLATION

It is a requirement that all Kalora solid fuel and gas appliances are fitted by a qualified, licensed installer whose work complies with local council regulations, Australian standards and manufacturer's specifications. Failure to correctly install is extremely dangerous, will void any warranty claims and may compromise any future insurance claims.
