

SMOKELIS
THE SMOKELESS FIRE PIT CO.

Product Overview

Fire Pit Detail

Material Thicknesses

We use the thickest material suitable to the part of the fire pit it is on to radiate heat and create draw for the secondary burn, and be as strong as possible.

Secondary Combustion Air Chamber

The double-walled design, precisely sized and tested for airflow in combination with the internal outlet holes, provides the super-heated oxygen which creates the secondary/smokeless burn

Heat-Delete Base

The unique design of the base holds a specially designed thermal-break which enhances the energy retention in the fire itself, protecting surfaces beneath it and projecting more heat where you want it.

Accessories Sleeves

These are for receiving the stainless steel posts that come as part of the Adjustable Rack System. Just drop in or lift out.

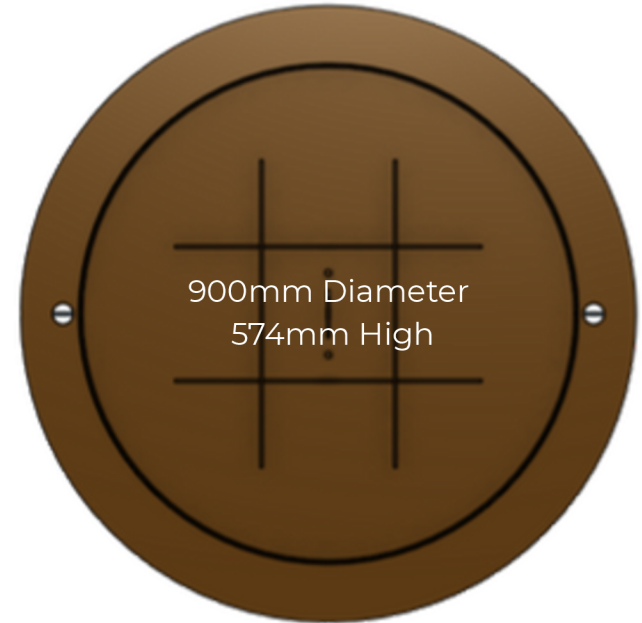

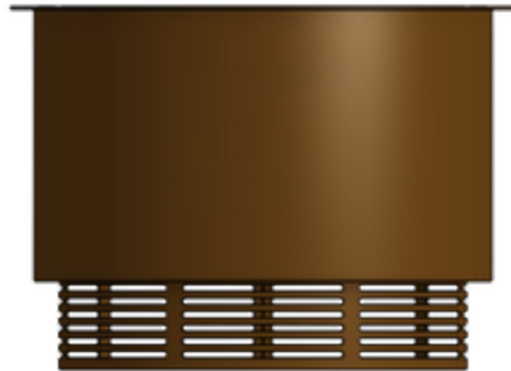

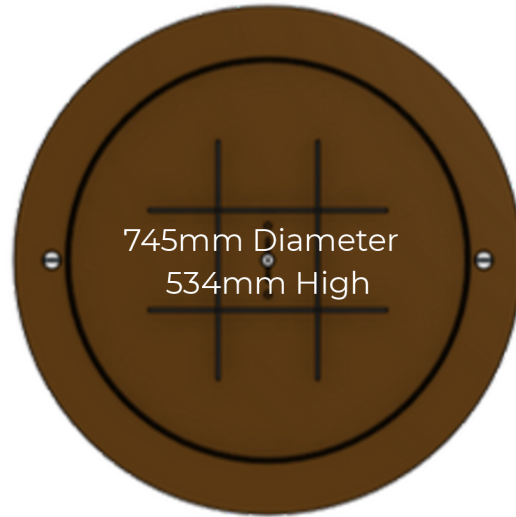

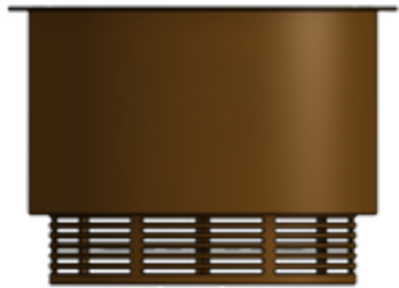

Fully Welded

Using a unique mixture of wire-filled and fusion welds, we fully weld flat seams and precisely place fillets based on the materials natural positioning. Every fire pit is the strongest it can be and totally unique.

Removeable Ash Pan

The ash pan in the base of the fire pit lifts out for easy clean out of the ash. This also drains, should rain get into the fire.

Sizes

Materials

Corten

This is our fully corten steel option. Corten steel being a natural weathering steel that has a unique compound making it extremely durable in the elements.

Stainless

This is the fully stainless steel option. We use 304 grade stainless steel from trusted sources that are grade tested. Stainless oxidates in a unique way that leaves no visible stain for a bright modern finish.

Stainless/Corten

The Stainless/Corten combination is effectively a completely stainless fire pit, with just the outer layer being corten steel. This is purely for aesthetics as it is a unique look with a bit of modern and rustic combined.

NOTE: All Corten is shipped in mill finish which is black - this will develop the patina naturally at differing rates depending on climate.

Fire Accessories

Made to suit your size of fire pit

Ember Shield

The Ember-Shield is a large perimeter base for beneath the fire pit to protect combustible surfaces such as timber decks and/or add beauty to complete the look of the fire pit. The fire pit simply sits on top of it and stones or other decorative non-combustable material can be added around the base of the fire to complete the look.

Fire Accessories

Made to suit your size of fire pit

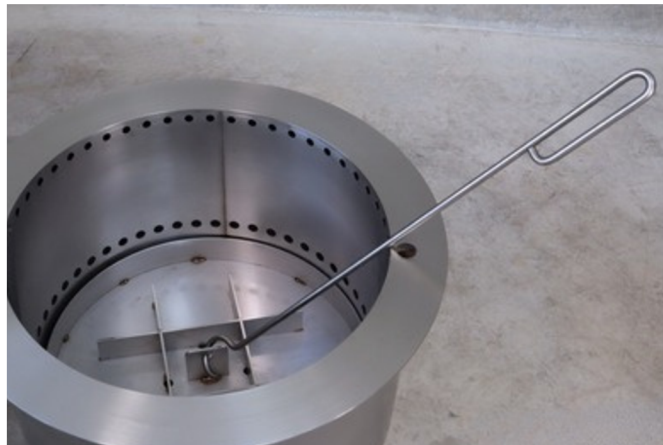

Lid

A simple but essential accessory. Keeps rain off the ash so that it is dry for clean out. Also great if you want to pre-load the fire pit with kindling and starters ready to be lit at any time.

Fire Poker & Ash Pan Tool

Specially designed for hooking out the ash pan in the base of the fire pit. The Fire Poker is also obviously a great tool for rearranging and managing your fire to keep a consistent clean burn.

Wood-Fired Cooking Accessories

Made to suit your size of fire pit

Hot Plate

The Hot Plate slides on the side, and hooks under the rim of the fire pit. Great for full contact sear, smash burgers, toasting. Made from thick, 100% 304 Stainless Steel. It also features a fat drain slot at the front and has a very slight tilt toward the fire to make clean down easy so you can have a full contact with whatever you are cooking every time for that beautiful caramelisation.

Wood-Fired Cooking Accessories

Made to suit your size of fire pit

Grill Grate

Fits to the fire pit the same way as the Hot Plate. The Grill Grate has a slotted design to have 50% contact and 50% flame exposure for a direct heat sear - great for getting those grill lines! Made from 100% 304 Stainless Steel

Wood-Fired Cooking Accessories

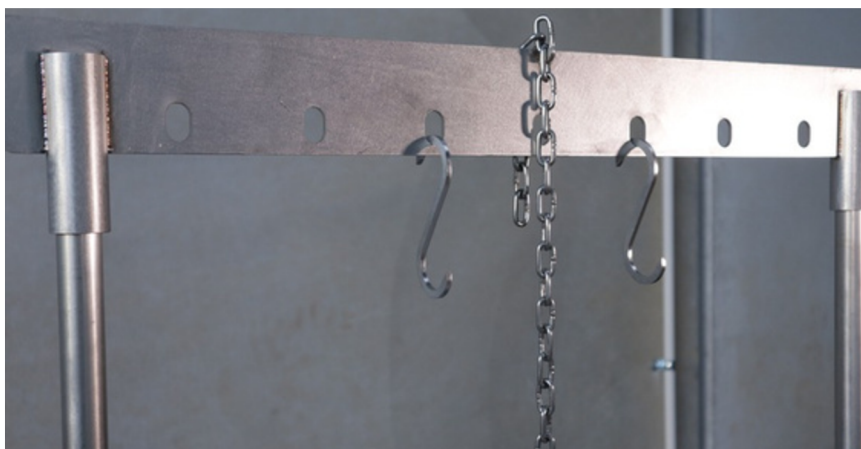

Made to suit your size of fire pit

Adjustable Rack System

Imagine; slow cooked pork ribs, beef short ribs, a whole picana, corn on the cob, hanging a Tomahawk steak or leg of lamb - all cooked to perfection with delicious wood flavour.

The Adjustable Rack system is a grill/rack that raises and lowers above the fire pit, while stabilised on two solid stainless steel guide posts.

The Overhead Rack component has an easy one-handed operation hook on it, to lift the rack with the chain and set it at your desired cooking height based on winds and fire temp and type of cook being done.

Meat Hooks

Meat Hooks from 4mm 304 Stainless Steel. Slightly wide open "S" shape with super sharp tips for pushing through sinew or thick sections of meat. Then hang it up from the rack system, either above or below the rack for epic low and slow cooking.

Wood-Fired Cooking Accessories

Grill Tools:

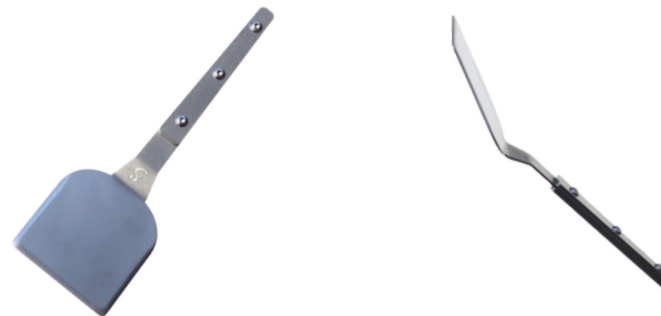

Burger Press

Stainless Steel Burger Press. With a beautiful textured gripped handle, fully welded with no nasty spots to get food stuck.

Flipper

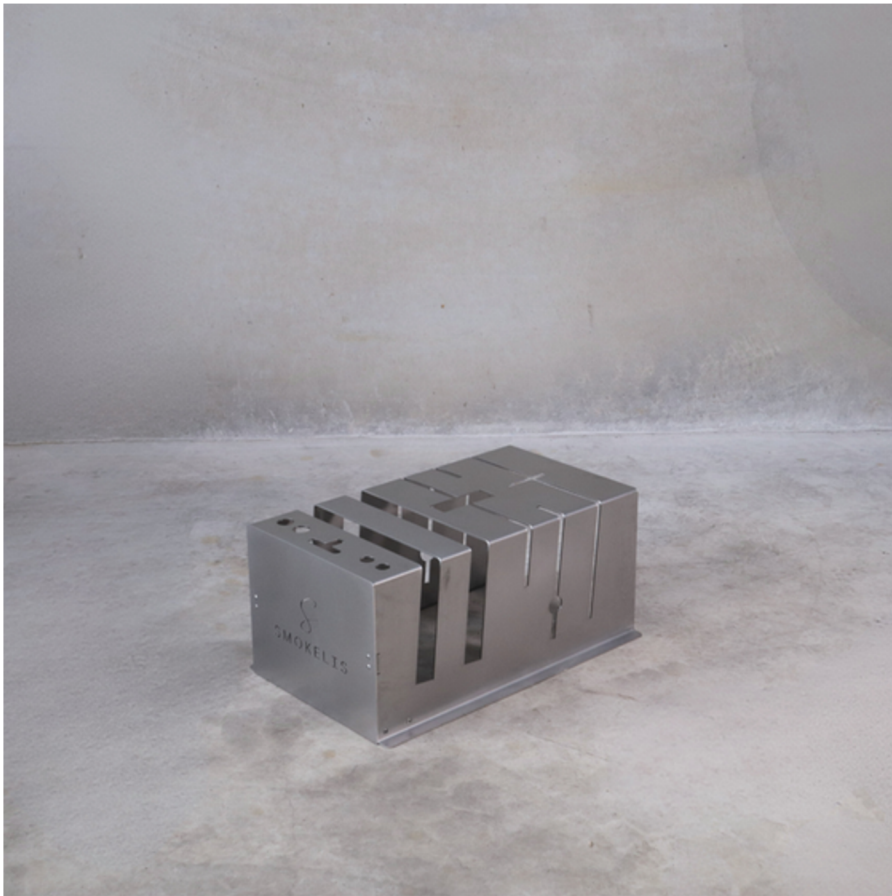

Stainless Steel Flipper/Spatula. Perfect for managing food and flipping steaks, burgers etc. 100% Stainless Steel - no wooden or composite handle to deteriorate and get food stuck

Accessories Holder

The Accessories Holder is a must-have if you have any of the Smokelis Wood-Fired Cooking Accessories, and it also has storage for your Lid and Fire Poker as well.

Made 100% from thick stainless steel, this is durable and looks the part with all your accessories ready to go to make for easy access, and safe storage next time you are hosting or cooking up a storm over your Smokelis.

Fire-Side Accessories

Wood Box

The Wood Box is an essential fire-side accessory to pair with your Smokelis fire pit. Storing 0.5 cube of stacked firewood right next to the fire, providing a surface to prep and serve food without walking to and from the kitchen, and doubles as a drinks bar - all on castors for super practical positioning.

With the corten steel (or custom finishes) body and stainless prep surface, it looks stunning.

854mm high, 1110mm wide, 685mm deep.

Bench Seats

The fire-side Bench Seats are designed and built with the same visual and functional intent of the Wood Box with the firewood storage and corten and stainless, only to provide practical seating around your Smokelis fire pit. There are 3 common lengths (1.2m, 1.5m, 1.8m).
