SystemSync® OTA Service

Keeping Your Electronics Continuously Up to Date

The Challenge

- Electronic systems require constant software updates
- Manual updates are time-consuming and error-prone
- Outdated software increases security risks

The Solution

SystemSync® OTA Service

- Delivers automatic, wireless software updates
- Ensures devices always run the latest version
- Maintains optimal functionality and security

What We Do

We **design and integrate** custom **SystemSync® OTA** solutions into your products:

- Remote update capabilities
- Optimized performance

SYSTEMSYNC® SERVICES

SALES SHEET

- Seamless user experience

How It Works

Using our **Over-the-Air (OTA)** service:

- Software, firmware, and data are delivered wirelessly
- Updates occur over a **cybersecure connection**
- Devices stay current—no physical access required

Example

Just like **Windows Update**® keeps your computer up to date, **SystemSync**® keeps all your electronics current— automatically, securely, and seamlessly.

Why Choose Us

- Proven expertise in OTA integration
- Cybersecurity built into every layer
- Scalable architecture for multiple devices
- Ongoing support and maintenance

Let's Modernize Your Product

Ready to bring your systems into the future?

Let's build a smarter, connected solution with **SystemSync**® OTA.
