

SHEDS, SUMMERHOUSES & PLAYHOUSES

www.ukgardenbuildings.co.uk

OUR STORY

As a family-run business, we've been crafting the finest handmade timber and composite garden buildings for years. Our commitment to quality, affordability, and exceptional service is unwavering.

We proudly acknowledge that much of our trade is built around our reputation. As all our buildings are manufactured in-house, you are not limited to the sizes or styles you see in this brochure.

1991

"In 1991, UK Garden Buildings was founded in a modest factory located in Rugeley. Learn how this family business has transformed since 1991 into the thriving enterprise it is today.

2002

In 2002, we attended our first trade show, GLEE in Birmingham, where we initiated crucial agent partnerships and began building our established network.

2009

Rewind to 2009, We achieved a milestone! Our Elite Insulated Garden Room makes its TV debut on 'Love Your Garden' with Alan Titchmarsh. See the Innovative features that set us apart.

2016

We relocated to a larger manufacturing unit in Stafford, which has become the heart of our operations. It now functions as our head office and manufacturing unit, where we hand-build every garden building.

2023

In 2023, we made a significant investment to expand our product line by purchasing Home Garden Rooms, specialists in annex buildings. This acquisition has allowed UK Garden Buildings to offer almost every type of garden building.

A modern, single-story garden shed with a dark grey roof and light grey horizontal siding. The shed features a central dark door with silver handles and two large windows on either side. The windows have dark frames and show reflections of the surrounding environment. A person is visible through the right-hand window. The shed is situated on a green lawn, with shadows of trees cast across it. In the background, there are lush green trees and a portion of a brick house with a gabled roof and dormer windows. The sky is blue with some light clouds.

SHED COLLECTION
