CQ
Simple Communication

Simply Hosted:
Communication Made Simple.

Work smarter

A full set of enterprise features providing next generation communication.

Simply Hosted features advanced phone system features that will help your business operate more efficiently.

Auto Attendant
Let a customized virtual receptionist answer and route all your calls.

Mobile
Make and take calls directly from your mobile device without sharing your cell phone number.

Call Queue
Route callers to the next available company representative in a queue.

Find Me/Follow Me
Your phone number can ring on any device and any number, anywhere.

Voicemail-to-Email
Get your voicemail messages as sound files in your email.

Presence
Easily see who's available and who's on a phone call via a visual display.

Time Based Greetings
Create customized messages for holidays, long weekends, or any time of year.

Ring Groups
Manage incoming calls to automatically ring to certain users or departments.

Online Portal
You'll have the ability to manage your own features and service

And much, much more.

CQ
Simple Communication

Moving forward

With Simply Hosted you can prepare for tomorrow...today.

Flexible for the Future

As opposed to a traditional on-premise phone system a Simply Hosted cloud system can grow as your business grows. With under 1 minute of downtime, your system can upgrade to fit any number of extensions. Saving you money in both time and labor.

If you choose to utilize our NimbusWatch router you can maximize the quality of service (QoS) with dynamic prioritization of your voice packets. Making sure your conversations have highest priority on your network.

We also offer a variety of devices and accessories, such as conference room phones, headsets and ceiling speakers to complete your business phone system.

Mobile Compatibility

Increase your productivity by utilizing our mobile apps that can be found in both the iTunes and Droid store. Access your voicemail, initiate and take calls, all from your mobile device.
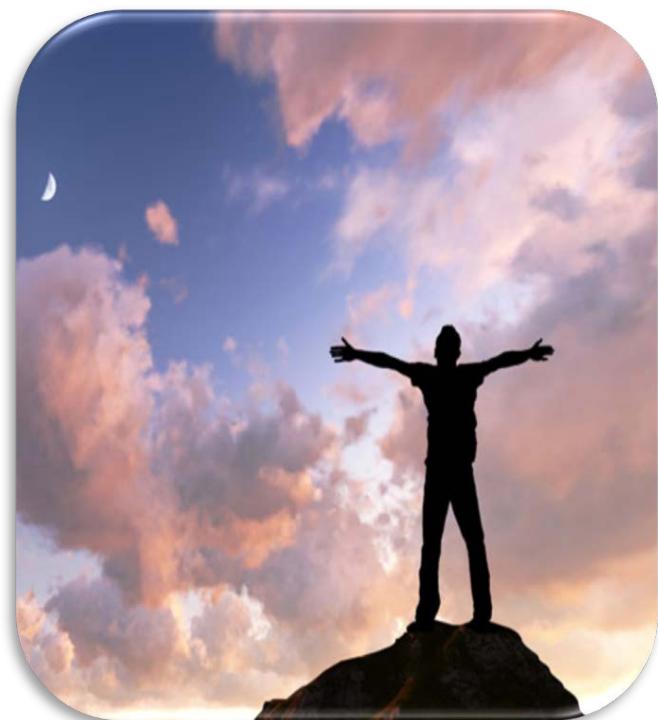

*W*ithout limits

Together, let's release the power of the cloud.

Legacy phone systems are restricted by high costs and limited functionality. CQ has taken that outdated, expensive technology and moved it to the cloud.

Now, we can offer you a Hosted PBX phone system that grows as you grow, providing you with complete flexibility, continuous cost savings, and a host of advanced features. Not only will CQ's Simply Hosted reduce your costs, but it will also allow your team to stay in touch easily and work smarter, both in the office and on the go.

CQ can offer you:
- up to 90% savings on your phone bill
- zero upfront cost CQ IP Phones
- simple and easy installation
- credibility of a professional sounding phone system
