

## 208 Serie Controllers with Brains

Installing a technical solution has never been easier thanks to the BRIQX controllers. With these controllers, you can create virtually any interactive setup.

Each of the 4 controllers has its unique properties, keeping the assembly and installation process clear. Elements such as buttons, triggers, and sensors can be easily connected, thanks to the control from the controller and the auto-detection function.

Adjusting the settings is just as straightforward. You can do this with your phone or simply by reading in the new settings.

These controllers provide a solution to avoid complex installations with a lot of hardware. Connect the controller to the power adapter, and if you want additional functionality, simply add an extra controller to the Qbus.

The remaining controllers use the existing power adapter; additional adapters are not necessary. Connect your buttons and elements, and the setup is ready for use.

A controller can also serve as a satellite when connected to another controller or intelligent media player. An API is available for this purpose.

## FEATURES AND BENEFITS

1. Standalone Intelligence: The BRIQX Controller stands out as a true standalone controller with built-in intelligence, resulting in significant cost savings.
2. Flexible Configuration: Choose from four controllers, each tailored to specific needs, and easily add Wireless Connectivity: Controllers can be wirelessly connected, eliminating the need for raised floors, even in locations where wiring is challenging.
3. Independent Command Reception: When linked to a third-party media player supplier, the BRIQX Controller can independently receive and execute commands, enhancing its adaptability in various setups.
4. Simple Installation and Expandability: With controllers of the same dimensions, the installation is straightforward. Connect the controller box to the adapter and link additional controllers. One power source is sufficient for all connected controllers and elements.
5. Diverse Element Options: A wide range of plug-and-play elements is available, including proximity sensors, RFID, capacitive touch buttons, active NFC, LEDs, and more.
6. Easy to Configure: Connect your phone to modify the settings easily.

PRODUCT CODE	EAN CODE	DESCRIPTION
EC.10.0005.208	9501729768222	<b>Controller 208a</b> 6x Push button, 2 x Elements connection, 1 x IR, USB, Qbus / Qbus wireless
EC.10.0010.208	9509931874861	<b>Controller 208b</b> 4 x Pushbutton, 4 x Elements connection, 1 x IR, USB, Qbus / Qbus wireless
EC.10.0015.208	9501649956884	<b>Controller 208c</b> 8 x Elements connection, 1 x IR, USB, Qbus / Qbus wireless
EC.10.0020.208	9504155121180	<b>Controller 208d</b> 4 x LED, 4 x Push button, 2 x Elements connection, 1 x IR, USB, Qbus / Qbus wireless

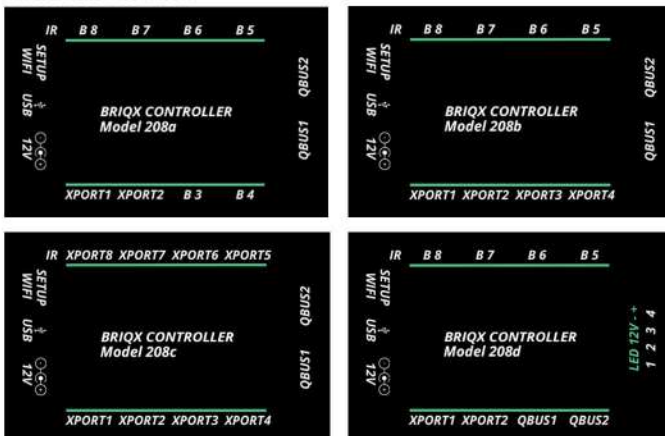

### Complete your order with these products:
