

P.G.E.® Method

**The problem is not the event.
It is the process that makes it possible.**

Context

In complex decision-making systems, errors do not arise from the absence of data but from their interpretation.

Problem Statement

- data fragmentation
- confusion between facts, interpretations, and evaluations
- lack of traceability
- absence of structured frameworks

P.G.E.® Analytical Framework

Structured analytical framework designed to control the analytical process, based on verifiable data, analytical traceability, and separation between facts, interpretation, and analysis.

Analytical Outcomes

- Compatible
- Not compatible
- Not verifiable

Institutional Relevance

Enhances traceability, transparency, and structured analysis in complex institutional environments.
