

Methodological Framework for the Analysis of Complex Decision-Making Systems

INTRODUCTION

Presentation framework intended for professional, judicial and institutional environments.

CORE PRINCIPLE

The issue is not the event itself, but the process that enables its occurrence.

ANALYTICAL FRAMEWORK

Based on verifiable data, traceability, methodological consistency and separation between facts and interpretation.

TECHNICAL APPLICATION

Document analysis, structuring of complex informational systems, technical verification and consistency assessment.

OPERATIONAL CONTEXTS

Judicial analysis • Institutional evaluation • Forensic documentation • Complex decision systems

OUTCOMES

Compatible • Not compatible • Not verifiable

LIMITATIONS

The framework supports technical analysis and does not replace judicial, institutional or decision-making processes.
