

P.G.E.® Methodological Framework

Analysis of Complex Decision-Making Systems

Document purpose

Institutional presentation of the P.G.E.® methodological framework.

Core principle

The problem is not the event but the process that makes it possible.

Analytical framework

Based on verifiable data, analytical traceability, and separation between facts and interpretation.

Technical application

Procedural document analysis, structuring complex data, and consistency verification.

Outcomes

Compatible – Not compatible – Not verifiable.

Limitations

Not a decision-making tool and does not assign responsibility.

Governance principle

Data does not constitute evidence until it is governed.

Access conditions

Available upon request – for professional and institutional use.
