

# Intrusion Detection System

The ultimate solution for protecting your property  
– Commercial or Residential

Extra layer  
of added  
protection to  
high-risk  
areas

## The TEC Intrusion Detection System:

- Activates when the perimeter is crossed entering or leaving
- Can be set to monitor people or vehicles
- It records activity and will send an alarm if required
- Works effectively both day and night in all weather conditions
- Provides an extra layer of security for your home or business

Using the latest technology, the intrusion detection system from TEC Security is the ideal solution for preventing unwanted visitors to your site. Use in areas where there is little movement such as remote areas or rooftops to alert in the event of an intrusion.

Add this option to your regular CCTV video monitoring to give you an extra layer of security. Used commonly on building sites or areas at high-risk. Advanced technology and high-quality equipment result in very few false alarms.
