National Small Business Perspectives on Child Care

September 28, 2021
About Small Business for America’s Future

- Small Business for America’s Future is a national coalition of business owners and leaders working to provide small businesses a voice at every level of government.

- We’re committed to ensuring policymakers prioritize Main Street by advancing a just and equitable economic framework that works for small business owners, their employees and their communities.
The 1,060 small business owners responding to the survey say the lack of affordable child care options for employees is an issue that has been exacerbated by Covid and is causing them problems with hiring, impacts their ability to deliver for clients, and forces them to pass up growth opportunities.

- Small Business for America’s Future fielded a national survey of 1,060 small business owners across the country between August 2-20.

- The national results show strong small business support for federal solutions to address child care:
  - 66% of small business owners surveyed nationally believe the federal government has a role in supporting universal access to affordable, high-quality child care
  - 64% support direct, ongoing financial assistance to families for child care services
  - 70% support federal funding dedicated to providing child care services to underserved communities
Where do small business owners stand

- 72% of small business owners surveyed said they have employees with at least one child under 13 or that have a need for daily child care services
- But just 28% offer benefits related to child care
To the best of your knowledge, what number of your employees have children under 13, or require daily child care services?
Do you offer your employees benefits related to child care, such as on-site child care, flex-time for parents, or financial assistance?

- Yes: 28%
- No: 72%
The impact the lack of quality child care has on business

- 55% of small business owners surveyed believe that the lack of affordable, high-quality child care for employees has had a negative impact on their business.

- 56% say they’ve lost business income, 60% say they’ve lost growth opportunities, 45% said they’ve avoided hiring an employee due to scheduling complications.

- 52% have experienced employee turnover as a result.
The high cost of child care causes small businesses problems in hiring and retention

- The high cost of child care has created problems with employee hiring, retention and business operations for most small business owners surveyed:
  - More than 1 in 3 employers (39%) said scheduling complications have negatively impacted their ability to fulfill client or customer needs
  - Over a quarter of employees (28%) said scheduling concerns have prevented or delayed them in hiring an employee
  - Nearly 1 in 3 employees (30%) said potential hires have turned down jobs because of child care concerns
Do you believe that the lack of affordable, high-quality child care for employees has had a negative impact on your business?
