DAILY USE AND MORE**

- ofte med specialkrav, hvor vi kombinerer styrke, intelligens og brugervenlighed.

A WORLD OF DOORS

A more efficient business

At DAN-doors, we know what we're talking about

Every day, we work to develop and improve doors that make our customers' business more efficient, more sustainable, safer and more responsible.

Why Doors Matter More Than Ever

In data centers, doors define

Who gets access — and who doesn't
How fire and security is contained
How safely and efficiently operations run

And they must do this every day...

A WORLD OF DOORS AND EXPERIENCE

Solutions that last for many years

Deliveries to many industries

At DAN-doors, we have specialized in developing and producing doors for all purposes in all industries and all sizes since 1983.

Many of our customers have done business with us for several decades because they know that with us, they get solutions that last for many years, and over the years we have solved tasks that seemed impossible.

Special development

Deliveries

500 units
per datacenter

Data Centers

Special development

Free opening up to width 2800 mm x height 3400 mm

High security doors (RC3 / RC4)

Certified doors that meet resistance classes RC3 and RC4 – even in large and extra-large versions

Designed for high-risk and restricted zones

Prepared for integration with access control and security systems

Fire-rated door solutions

Certified fire doors up to EI₂ 120, including large and customized door formats

Supports fire sectioning and protection of critical IT equipment

Designed to meet data centers' high security and compliance requirements

Technical & Operational Doors

Doors to technical rooms, electrical rooms, battery rooms and cooling areas

Designed for frequent use, high durability and safe access for service and maintenance

Custom-designed door solutions

Project-specific designs adapted to the data center layout and workflows

Flexible solutions that support phased build-out and future expansion

Fire tested EI₂ - 120

Fire-rated door solutions

Certified fire doors up to EI₂ 120, including large and customized door formats

EI120 / RC4 Fire safety door / 1-leaf with upper panel / 100 mm

Specifications

Max. width	1390 mm
Max. height	2990 mm
Frame	1,5 mm stainless steel, Galvanized
Insulation	Rockwool with plaster
Hinges	Stainless steel
Door leaf	100 mm
Purpose	Fire, Safety
Brand certification	EN 16034-1
Safety certification	EN 1627

Benefits

- ✓ Burglar-resistant door (RC4), certified according to EN-1627.
- ✓ 120 minutes fire protection (EI-2 120), certified according to EN 16034-1.
- ✓ Available in very large sizes
- ✓ Fire sealing strips mounted on door leaf.
- ✓ EPDM smoke seal mounted on frame.
- ✓ Robust construction with very long service life.
- ✓ Requires no (or minimal) maintenance.
